

General Mills Concrete Curbs, Panels & Door Package

Covington, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the General Contractor for the General Mills Concrete Curbs, Panels & Door Package Project in Covington, GA.

This challenging project took place inside the existing Covington facility in the Delta Building. Our teams worked 7 days a week, two shifts, to install new concrete curbs / foundations that varied from 6" to 2'-0" tall. Each curb was used as the base for new insulated metal panel walls, that ranged in size and material from fire partitions to stainless steel.

Additional scope included the installation of industrial doors, (speed doors, roll-up doors, man and bump doors). Equipment pads and new openings through existing pre-cast walls were also added.

The JMW teams are currently working inside the plant and are targeted to complete this project on time and within the budgets.
