### *Our Mission*

J.M. Wilkerson Construction's mission is to manage the construction process to ensure we give our clients more value than expected in Quality Assurance, Cost Control, Schedule, Performance, Working Relationship and Safety.

Jim Wilkerson  
Owner/Chairman

- The JMW commitment extends beyond the construction process. We strive to earn your trust. Trust is the foundation to all successful working relationships.
- We perform our work with integrity. Our word is our commitment, and we never waiver from a commitment we make.
- We take ownership of a challenge. Challenges are inevitable, therefore, we admit our mistakes and take corrective action to ensure a positive end result.
- We work hard to exceed your expectations. This is our mission and our commitment to you.

J.M. Wilkerson Construction seeks long term involvement with our clients. Repeat business from satisfied clients is critical to our success. As partners in the construction process, we work together to reach common goals.

# Firm Description

**Building for Generations**

## Company Information

J.M. Wilkerson Construction Co., Inc.  
1734 Sands Place - Marietta, Georgia 30067  
Primary Contact - Mike Travis  
Telephone: 770.953.2659 Fax: 770.933.9665  
E-mail: [mtravis@jmwilkinson.com](mailto:mtravis@jmwilkinson.com)  
Website: [www.jmwilkinson.com](http://www.jmwilkinson.com)

- J.M. Wilkerson has been in Business for over 38 years
- Ownership - Corporation
- State of Residency / Incorporation - Georgia
- Office Location - Marietta, Georgia

Blue Ridge Dam - Blue Ridge, Georgia

Established in 1982 by Jim Wilkerson, J.M. Wilkerson Construction provided tenant interior renovations before expanding into industrial, office, institutional and concrete work. Today, JMW provides a wide array of services and has experience in many building types including, but not limited to, multi-family, historic renovation / adaptive reuse, industrial, tenant interiors, retail, religious, institutional, transportation, hospitality, concrete, rail and environmental projects. Our mixture of commercial and heavy/industrial projects is unique in the Southeastern markets.

The ability to provide services to both major market sectors, allows our teams to work on a wide array of projects. When it benefits a project, JMW can perform sub-contracting work in-house, providing a single source of responsibility and management. This frequently adds genuine value to our team and provides the client with greater protection. JMW's steady growth is based on the continued commitment of Mr. Wilkerson and his employees to provide personal attention and exceptional service to each client. Mr. Wilkerson takes pride in his organization and plays an active role in every project JMW undertakes. This family owned business works hard to maintain its quality and talented staff, many of whom have been with the company for over 38 years.

JMW's President and CEO is Brett Hawley. Brett joined the team in 1994, moving from Kansas City, MO to Georgia. His extensive knowledge in heavy construction complemented JMW's already broad experience base. Brett brought not only heavy civil and construction backgrounds, but commercial, hospitality and estimating knowledge, as well. Brett has helped the JMW team grow many new market sectors providing additional experience for future jobs.

JMW's Vice Presidents are Austin Pruitt, Michael Travis and Chris Griffeth. Austin Pruitt has worked with JMW in various roles and is now the Chief Estimator. Pruitt's knowledge of construction, estimating, and his ability to coordinate subcontractors makes him a valued member of the JMW Estimating Department. Austin works with both our Commercial Construction bids and Heavy Construction Departments and leads most estimating for JMW.

Mike Travis is the leader of the JMW Business Development department. He has been connected to the Design, Construction and Development industry for more than twenty years. As an architect graduating from the University of Oklahoma, he helped to execute and manage over a billion dollars in projects with teams like RTKL, Perkins Will and Smallwood Reynolds Stewart Stewart. His background in architecture, development and construction is critical to JMW's pre-construction efforts and new business pursuits.

As one of JMW's most accomplished project managers, Chris Griffeth has worked on all types of projects and has been with the JMW team for over 10 years. Possessing many strengths in his management, Chris has become quite successful in the administration of HUD or federally funded as well as task order or on-call projects. He has successfully completed multiple projects for the Atlanta Housing Authority, City of Atlanta as well as Federal and Military agencies.

**Building for Generations**

## Services

J. M. Wilkerson Construction offers a well-rounded array of construction services in the following areas:

### Pre-Construction Services

Planning and Procurement  
Design Review & Value Analysis  
Budget and Cost Estimation  
Value Engineering  
Building Information Modeling (BIM)  
LEED or Sustainable Construction Review  
Design / Build  
Scheduling

### Construction Services

Project Management  
Cost Control  
CM @ Risk  
General Construction  
Sustainable Construction  
Environmental Construction  
Heavy /Civil / Concrete Construction  
Site & Grading

We take great pride in giving our clients more value than they expect, and to that end, dedicate ourselves to constructing the highest quality product available. Just as significant, are the relationships we develop along the way.

We strive to establish a healthy, respectful relationship that will help us provide the highest level of service, which will continue in the years ahead. This philosophy has remained a consistent thread throughout JMW's 38 years in operation, allowing us to continue "Building for Generations".

Venue Brookwood Apartments - New Housing

Avondale Hills - New Construction

Hotel Indigo in Athens, GA - LEED Gold

MARTA Grout Pockets - Heavy Construction

## Green Building Experience

The philosophy of sustainability has become a major focus to many owners. This philosophy has also been embraced by both design and construction professionals across the country. With this new emphasis to provide more efficient buildings and practice more sustainable construction, the development of new operating procedures has become essential. The teams at J.M. Wilkerson Construction have been responsible for the construction of over \$97.6 million in completed LEED (Leadership in Energy and Environmental Design) or sustainable projects. These projects have included residential, commercial and industrial types of construction, covering over 225,364 square feet of area.

With this relatively new type of design and construction, our teams have made great strides in obtaining the necessary skills to both document and execute sustainable projects of this type. With LEED accredited professionals on staff at JMW, we have created detailed procedures for tracking projects from creation through implementation. Our teams have been able to achieve tremendous success with respect to sustainability goals on behalf of our owners.

The process and execution of a sustainable project is greatly dependent on the communication skills and involvement of both the design and construction professionals. The earlier these teams begin to review the level of sustainability an owner seeks to achieve, the greater the chances for success. In addition, the decision to develop a sustainable project requires a team to closely review the type of materials specified, the construction staging proposed, the electrical and plumbing designs, as well as, the smaller details throughout the facility.

Our construction teams make every effort to perform and practice sustainability on every project. We work hard to divert construction waste from landfills, and to employ the use of local and recycled materials where possible. We have developed comprehensive Waste Management and Indoor Air Quality Programs, as well as, tracking forms necessary to maintain accurate records for the filing and recording of sustainable data.

In 2009, J.M. Wilkerson Construction won the Sustainability Practice award at the AGC Build Georgia Awards. AGC selected the DeKalb County Central Transfer Station, completed by our teams in 2008. This LEED Certified facility was delivered for just under \$25 million and was one of DeKalb County's first major LEED projects. The facility was situated on an existing brown field and required the removal of over 100,000 cubic yards of unsuitable material and incorporated both industrial and office building structures. The project was completed 4 months ahead of schedule with no owner change orders. More recently completed projects incorporating LEED or sustainable construction practices include the Indigo Hotel located in Athens, GA, CHRIS Kids located in Atlanta, GA, and Charlottetown Terrace located in Charlotte, NC.

Over 1532 tons of waste diverted  
On Hotel Indigo - Athens, GA

Deepdene Park Restoration - Atlanta, GA

With the completion of the 93,477 square foot Indigo Hotel, J.M. Wilkerson Construction made history completing the 9th LEED Gold hotel worldwide. This was also the first hotel for Intercontinental Hotels Group (IHG) to reach a GOLD rating within their 4,400 hotels worldwide. This project diverted over 1,600 tons of construction waste from landfills and was constructed in only 12 months. This project won J.M. Wilkerson Construction the 2010 Sustainable Practice award from the AGC, as well as, a ULI award of Excellence.

J.M. Wilkerson Construction was also awarded The Affordable Housing Builder of the Year for Earthcraft Multi-family 2010. This award was presented for work on the CHRIS Kids project. This multi-family housing development devoted to help young adults from prior foster care situations, and was the first of a two-phase project. The award was presented by the Southface Energy Institute and was one of the first Builders Challenge multi-family projects recognized by the U.S. Department of Energy.

The \$11 million LEED Gold Affordable Housing project, Charlottetown Terrace, located adjacent to downtown Charlotte, was completed on time and within the authorities budget by the JMW team as a Construction Manager at Risk.

Charlottetown Terrace had a complex commissioning process where the owners managed the overall process but utilized both outside commissioning agents, as well as, our own team LEED AP to provide the necessary documentation and activities to reach their goal.

We worked with the Charlotte Housing Authorities to set up regularly scheduled meetings where commissioning was outlined, defining roles of responsibility. Team members were assigned specific scopes of work required to reach the LEED goals. JMW was assigned direct commissioning responsibilities that included the coordination and verification of many aspects of the enhanced commissioning process. Our team also provided direct assistance on all final training and verifications, as required by the commissioning process.

Both field and office staff provided reports, submittals and RFI's to the owner's commissioning team. Any changes in the construction documents or material selections required specific reporting to maintain accurate accounts of where the project stood. JMW's team was directly responsible for this coordination with the design team.

We provided all verification for materials, recycling, installation methods and waste reporting. We shared the responsibility with the rest of the owner's team that construction was in-line with the commissioning agent's base building design model. Commissioning meetings and inspections were pro-actively scheduled to include all major milestones for HVAC installation, lighting, roofing, and items that affected the base energy model set by the team.

Other sustainable construction experiences included working with teams like Energy Ace and DeKalb County's LEED consultants for the Indigo Hotel and DeKalb County Transfer Station. Each project had its own unique twist on the Commissioning process but was formatted in a more conventional Owner, Contractor, LEED consultant role. Our LEED and sustainable background offers great benefit and experience to meet the needs of any project.

### JMW Teams have Successfully completed more than \$97.6 Million in LEED projects

- Indigo Hotel, Athens, GA - \$15.1 Million - LEED Gold
- DeKalb County Central Transfer Station & Administrative Headquarters - \$24.3 Million - LEED Certified
- CHRIS Kids, Atlanta, GA - \$4.8 Million
- Charlottetown Terrace, Charlotte, NC - \$11.1 Million - LEED Gold
- Imperial Hotel (Historic Affordable Housing Project - \$11 Million - LEED Multi-Family
- Lafayette Sustainable Housing Developments - \$5.7 Million
- Ponce City Market, Atlanta, GA - \$25.6 Million - LEED Silver

J.M. Wilkerson Construction is committed to the execution of innovative and challenging projects. We have made the commitment to provide the highest level of service combined with thoughtful and responsible construction practices.

## Building Information Modeling (BIM)

J.M. Wilkerson Construction utilizes Building Information Modeling (BIM) software on almost every project. Understanding the importance of this new technology for our industry, we have devoted full time employees to the development of its benefits, creating BIM models for pricing, clarification and review. In addition, we now work with our clients and design teams developing models that show Conceptual, Marketing, Estimating, Design, Logistical, As-Built Conditions, and Facility Management.

BIM creates a dynamic 3D model of a project which aids in the concept, design, and construction process. It does this through the use of object driven data which includes building geometry, spatial relationships, geographical information, quantities, and the properties of building components. This allows us to visualize, coordinate, predict costs, resolve conflicts, and extract data, before we actually start the construction process. Also, with advances in technology and software, BIM allows us to branch out into 4D encompassing time and scheduling, and into 5D integrating estimating and cost.

BIM has become a major part of our process from the pre-construction phase through final closeout, enabling the owners, design team, and construction team to see the project in a 3D digital model, during all phases of construction. Being able to visualize the project at the conceptual phase, allows us to plan budgets, logistics, and phasing, as well as, to define the scope of work for the individual trades, scheduling around any conflicts seen in the model. This helps reduce costs that may have required rework, change orders, RFI's, and delays to the project.

Using BIM's expansive databases for both quantities and material take-offs, creates a more accurate estimate and aids in the purchasing process. Once under construction, BIM enables the construction managers to better understand the design and accurately plan the remaining steps. It also enables our onsite managers to track the construction schedule through its use of project phasing. Also by tracking changes throughout the project, BIM provides a more comprehensive set of as-built drawings, allowing the end user to manage the facility with a detailed understanding of what was put in place during the construction process.

We strive to contract with Sub-contractors who have BIM resources, but often need to supplement their capabilities with our own expertise. If required by the owner or the project specifications, we will create as-built files that incorporate all structural, mechanical and electrical trades. This tool has become a critical step in our recent success with our sub-contractors, using it on many significant projects.

JMW utilizes the following programs:

- Revit Architecture
- Revit Structure
- Revit MEP
- Auto CAD Civil 3D
- 3DS Max Design
- Navis Works
- QTO
- Auto CAD (Full Suite)

GSU (BIM) Study - Atlanta, GA

## Personnel Capability

J.M. Wilkerson Construction's commitment to its employees has stayed strong throughout the company's history. JMW currently has over 84 employees. Located at our home office are 16 employees providing project and company management, as well as, estimating, accounting, marketing and administrative activities. Located in the field, providing supervision, are 19 employees. For additional detail see the break down below.

Home Office - 16  
Project Engineers - 2

Superintendents - 12  
Foremen - 5

Craftworkers - 29  
Laborers/Helpers - 20

## Safety Information

Safety in all of J.M. Wilkerson Construction's operations is not only a company goal, but a requirement. We create a culture in which safety is a core value. Our commitment is to provide a safe and productive environment for everyone involved with our projects. At no time will safety be compromised because of cost. OSHA standards are met or exceeded at all times.

It is JMW's belief that accidents can be prevented through planning, training and a cooperative effort in all areas of our operations, with our goal being to eliminate all injuries. This goal is accomplished by the following safe working practices on all of our construction sites.

The project managers, superintendents, foremen and safety manager have full support of management in enforcing the provisions of our Safety Policy, as it relates to the responsibilities assigned to them. Prior to start of work, each trade attends a preparatory meeting to discuss the scope of work, its hazards and controls.

Our superintendents and foreman are required to keep their safety training and education current. Each superintendent conducts weekly site safety meetings and inspections. We also utilize available safety resources such as the AGC's Site Safety Training Programs and the Construction Safety Competency Training courses.

JMW is a Drug Free Workplace, certified by the GA Workers Compensation Board.

### Required Supervisor Training

OSHA 30 Hour  
CPR / First Aid  
Confined Space Entry  
Fall Protection  
Scaffold Training  
Trench / Excavation Training

### Site Safety Items

New Hire Safety Orientation Training  
Site Safety Orientation  
Drug Free Workplace and Testing  
Safety Control System  
Preparatory Meetings

Hartsfield Jackson - Atlanta, GA

## Industry Affiliations, Memberships, Awards & Honors

Over the years, J.M. Wilkerson Construction has successfully completed many general construction projects for Federal, State, local and private clients. We have completed new construction, adaptive-reuse, historic rehabilitation, environmental, heavy civil, concrete, religious, industrial and tenant work. We pride ourselves on providing only the highest quality services, using the most professional teams possible. Over this history, JMW has been awarded many accolades for their services and successful completion of projects. These awards prove that team work help to make even the most challenging projects accomplishable. Listed below are only a few of the many awards and honors JMW has received.

- 2019 AGC Build Georgia Awards First Place - Wheat Street Tower
- 2018 AGC Build Georgia Awards First Place - Studioplex Commercial Podium
- 2017 AGC Build Georgia Awards First Place - Studioplex Parking Deck
- 2017 AGC Build Georgia Awards First Place - Lake Blackshear Resort Renovations
- 2017 AGC Build Georgia Awards First Place - Juniper & Tenth Renovations
- 2016 AGC Build Georgia Awards First Place/Best Sustainable Building Practices - Ponce City Market - Parcel F Deck
- 2016 AGC Build Georgia Awards First Place/Best Sustainable Building Practices - Atlanta Beltline North Avenue Plaza
- 2016 AGC Build Georgia Awards First Place - Lockheed Martin B1 Emergency Stairwell Egress
- 2016 ACI First Place in the Parking Deck Category - Ponce City Market Parcel F Parking Deck
- 2015: AGC Build Georgia Awards First Place - Ponce City Market - The Flats, GA Trust preservation Award for Excellence in Sustainable Rehabilitation - Imperial Hotel
- 2014: AGC Build Georgia Awards First Place - Imperial Hotel, Urban Design Commission Awards Of Excellence First Place - Imperial Hotel, National Housing & Rehabilitation Association Awards Best Historic Renovation using Tax Credits Finalist - Imperial Hotel, Atlanta Regional Commission's Development of Excellence Award - Imperial Hotel, Edson Award for Tax Credit Excellence - Imperial Hotel, NALHFA Exemplary Project - Imperial Hotel, AIA Atlanta Honor Award for Residential Design - Imperial Hotel, APAB Award of Excellence - Imperial Hotel, Preservation's Best Award - Imperial Hotel
- 2013: AGC Build Georgia Awards First Place - The Sweet Auburn Curb Market - Restoration, AGC Build Georgia Awards First Place Best Sustainable Practices - The Sweet Auburn Curb Market - Restoration, Urban Design Commission Awards of Excellence Award First Place - The Sweet Auburn Curb Market - Restoration
- 2012: Non-Profit Building and Design Award from USBGC Charlotte Region Chapter, 2012 Sustainable Business Awards - Charlottetown Terrace, Apartment Renovation of the Year from Multi-Family Executive - Charlottetown Terrace, Green Project of the Year from Multi-Family Executive - Charlottetown Terrace, Design/Build Award Runner Up from DBIA Southeast Region - Hartwell City Hall, Design Award from the City of Decatur - 313 E. College Avenue
- 2011: AGC Build Georgia Awards First Place - CHRIS Kids
- 2010: AGC Build Georgia Awards First Place - Rialto Room, AGC Build Georgia Awards First Place - Hotel Indigo, Athens, GA, AGC Build Georgia Awards First Place - Peachtree Creek Slope Stabilization
- 2009: AGC Build Georgia Awards First Place - Castleberry Point Lofts, AGC Build Georgia Awards First Place - DeKalb County Central Transfer Station, AGC Build Georgia Sustainability Award - DeKalb County Central Transfer Station
- 2008: AGC Build Georgia Awards First Place - MARTA Fare Barriers, AGC Merit Build GA Award - Renaissance Walk at Sweet Auburn
- 2007: First Place Award in the Specialty Category from the American Concrete Institute (ACI) - Brook Run Skate Park, AGC Build Georgia Awards First Place - Georgia National Cemetery
- 2006: AGC Build Georgia Awards First Place - Hardman Farm Phase I Stabilization
- 2004: AGC Build Georgia Awards First Place - Holy Transfiguration Greek Orthodox Church
- 2003: First Place Award from the American Concrete Institute (ACI) - Bus Lot Reconstruction for MARTA Laredo Bus Facility
- 1999: Award of Excellence from the American Concrete Institute (ACI) - Stone Mountain Lake Spillway Replacement, Award of Excellence for Adaptive Use from the Atlanta Urban Design Commission - Swift & Co. Lofts
- 1997 First Place Award in the Mid-Rise Category from the American Concrete Institute (ACI) - The University of Georgia Chemistry Annex Building

### Education

Kansas State University  
Bachelor of Science – Business  
Administration – 1968

### Business History

J.M. Wilkerson Construction  
Co., Inc.  
Owner/Chairman 1982 – Present

Holder Construction Company  
Superintendent 1972 – 1981

U. S. Army  
1<sup>st</sup> Lieutenant,  
Corps of Engineers  
1968 - 1971

Jim Wilkerson learned solid values growing up in rural Kansas, graduating from Kansas State University in 1968. He also learned valuable life and construction skills serving three years as an officer in the U.S. Army, Corps of Engineers. After graduating from Kansas State University, he worked for Atlanta-based Holder Construction Company for ten years. He won Holders' coveted Superintendent of the Year Award on two separate occasions, and he appreciated the opportunity to get involved with both large and small projects with such a reputable company.

In 1982, at the age of 35, Jim Wilkerson started J.M. Wilkerson Construction Co., Inc. He has overseen over \$500 million worth of construction in those years. He feels one of his greatest accomplishments has been putting a great team together - one that can manage through good times as well as adversity. Jim Wilkerson has always believed the success of a business depends on the quality and performance of its people. JMW has always prioritized the recruitment of the best quality employees and encourages continuous improvement through training and learning new developments in the industry to improve client satisfaction.

Mike Travis has been connected to the construction industry for more than seventeen years. As an Architect, he worked on over a billion dollars worth of construction projects. As a Developer/Owner's Representative, Mike oversaw hundreds of millions of dollars worth of work put in place for private equity teams, facilitating both the design and entitlement processes. Now, as a General Contractor, he has a wealth of knowledge, matched by few. This allows him to act as a bridge between Developer, Design Team and Construction Team. This coordination role has been very valuable during pre-construction and throughout the construction process.

# Studioplex Commercial Podium

Atlanta, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the General Contractor for the construction of the Studioplex Commercial Podium in Atlanta, GA.

The project consisted of a 30,852 sq. ft. concrete commercial building that fronts the Beltline. The roof of the commercial space was designed as a podium for future townhomes.

The Studioplex commercial building and townhomes are considered two distinct buildings stacked vertically per IBC 510.2. The lower building shall be the commercial podium building (Building 1), separated from future townhomes (Building 2) by a horizontal 3-hour concrete assembly, located at the Studioplex parking level.

# Ponce City Market Parcel "F" Projects

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. served as the general contractor for the new Ponce City Market Parcel "F" retaining walls and parking deck in Atlanta, GA.

The Parcel "F" project consisted of two unique projects. The first project was the stabilization and construction of retaining walls, which are located on the Southern sections of the Ponce City Market site. The JMW team worked to Design/Build a tieback wall capable of shoring up an existing cast-in-place retaining wall. It runs along the south section of the project. This wall was then used as foundations for an MSE wall, extending an additional 14'-0" up to the Bellline Plaza, located above this site.

The second phase of construction consisted of the construction of an 8 story, 168,000 sq. ft. cast-in-place concrete parking structure, events space and vertical connection from North Avenue to the Bellline, located adjacent to the site. This new concrete structure was designed and constructed to hold up an additional 15 possible stories for future development.

# Venue Brookwood Apartments

Atlanta, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the general contractor for a new apartment complex located in Atlanta, GA.

The project is located near the intersection of Colonial Homes Drive and Peachtree Road in Atlanta, GA. The project included 249 units and an overall heated SF of 335,599 sq. ft. JMW self-performed the 3-story, 180,000 sq. ft. parking structure. The parking deck has 18,640 CY of concrete with 1,364 tons of rebar. The project also included 3 levels of structured parking (partial below grade; shoring is required) below a level 4 Podium slab; with an Epicore (or similar) structure above to level 11/Roof. The scope of work also included landscape/hardscape as well as a dog spa.

J.M. Wilkerson Construction Co., Inc. was the contractor for the Owens Corning FG1 Rebuild in Fairburn, GA.

This project is unique in nature due to the shut down time frame. Owens Corning mandated a production line shut down to revamp the entire area. JMW was tasked with the approximate 500 CY of cast-in-place concrete in the area. The work had to be completed on time to ensure business continued as usual. This included around the clock work until it is completed, following all necessary stringent safety rules and regulations. JMW self-performed the concrete work.

# Castleberry Point Lofts Parking Deck

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was the general contractor for the Castleberry Point Lofts located in downtown Atlanta, GA.

This building is a 4 story wood and concrete structure consisting of 160,945 sq. ft. of residential space, and 35,384 sq. ft. of retail space at the street level. This multi-family project has 108 residential units and amenities that include an exercise/club room and a swimming pool located on the roof of the parking deck. The parking deck, at 93,000 sq. ft., was constructed using cast-in-place foundations, pre-cast vertical structure and field cast topping slabs. The deck was adjacent to the courtyard space that included a water fountain that was accessible from the street and commercial areas. This project was a Design/Bid/Build format, with contracts passing from the Owner.

# EIT Embankment Phase 2A - GA Power Tunnel

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was contracted to construct a reinforced concrete tunnel approximately 1,125 feet long for Hartsfield-Jackson Atlanta International Airport in Atlanta, Georgia.

This tunnel serves as a corridor for Georgia Power Company network cables crossing the EIT site and connecting the EIT. JMW used 9,000 yards of concrete for this project as well as 750 tons of rebar. In addition, the tunnel includes a utility duct-bank for the routing of FAA, BellSouth and Airport Security fiber optic communication cables.

# Georgia Dome Concrete Package

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. constructed the pile caps, ramps, crossovers, stairs, slabs and sidewalks at the Georgia Dome in Atlanta, GA.

The Georgia Dome is home to the Atlanta Falcons football team and also houses many collegiate games as well as concerts. The Dome is 374,584 sq. ft. and the athletic field measures 102,000 sq. ft. Seating at the Georgia Dome totals 71,250 permanent seats, with 203 executive suites, 4,600 club suites and a penthouse suite. It covers 8.9 acres and is the world's largest cable-supported domed stadium.

## Statistics

JMW placed 65,000cy of concrete.

JMW installed 3,000 tons of resteel.

JMW formed over 590,000 sq. ft. of elevated slabs and beams.

JMW finished over 1,000,000 sq. ft. of slab on grade and concrete ramps.

# Centennial Olympic Stadium Pile Caps

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. constructed the pile caps, for the Olympic Stadium in Atlanta, GA.

The 25,000 sq. ft. Centennial Olympic Stadium was the 85,000-seat main stadium of the 1996 Summer Olympic Games in Atlanta. Construction of the stadium began in 1993, and it was complete and ready for the Opening Ceremony in July 1996. It hosted track and field events and the closing ceremony. In 1997, it was reconstructed into the Turner Field, home of the Atlanta Braves baseball team.

## Statistics

JMW formed and placed 640 pile caps.

JMW set 640 sets of anchor bolts.

JMW excavated 18,000cy of dirt.

JMW placed 10,000cy of concrete.

JMW backfilled 8,000cy of fill and installed 150 tons of rebar.

# Greenfield Data Center Building (Check Free)

Johns Creek, Georgia

J.M. Wilkerson Construction Co. Inc. was selected to work with Turner Construction on the Greenfield Data Center (Check Free) in Johns Creek, Georgia.

JMW's scope of work included the turnkey concrete building package, including excavation and backfill of footings, pits, slab prep, site concrete, structural walls and roof structures as well as all other concrete associated with the construction of the new data facility. JMW's team completed the 83,341 square foot base buildings scope in 5 months, completing on time and within Turner's budgets. This project was a continuation of a long standing relationship with Turner Construction. At the completion of 2007, JMW was awarded Turner's sub-contractor of the year.

# Stone Mountain Aerial Tram Foundations

Stone Mountain, Georgia

J.M. Wilkerson Construction Co., Inc. constructed the foundations for the Stone Mountain Aerial Tram in Stone Mountain, GA.

Renovations to Stone Mountain Park's Aerial Tram proved to be a unique challenge. JMW has worked on several projects with tight site requirements, but this project proved to be our biggest challenge since construction took place at the top of the mountain. Concrete trucks could not drive up the mountain so concrete had to be pumped all the way up the mountain in order to complete this project. The project was a success due to several months of planning, experienced field employees and ongoing value analysis.

## Client

# General Mills Concrete Curbs, Panels & Door Package

Covington, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the General Contractor for the General Mills Concrete Curbs, Panels & Door Package Project in Covington, GA.

This challenging project took place inside the existing Covington facility in the Delta Building. Our teams worked 7 days a week, two shifts, to install new concrete curbs / foundations that varied from 6" to 2'-0" tall. Each curb was used as the base for new insulated metal panel walls, that ranged in size and material from fire partitions to stainless steel.

Additional scope included the installation of industrial doors, (speed doors, roll-up doors, man and bump doors). Equipment pads and new openings through existing pre-cast walls were also added.

The JMW teams are currently working inside the plant and are targeted to complete this project on time and within the budgets.

# Transportation

**Building for Generations**

# South Fork Pedestrian Bridge

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for the construction of the South Fork Pedestrian Bridge in Atlanta, GA, on behalf of the South Fork Conservancy.

This new pedestrian bridge will help to connect the Path 400 project with the existing South Fork Confluence trail as well as the Meadow Loop Trail and Cheshire Farm Trail. This new 175 foot central span bridge jumps Peachtree Creek, just East of Piedmont Road and adjacent to the I-84 / 400 South Merge. It provides a safe and exciting way to expand all of the various trails it will impact.

This project has many unique limitations as well as challenges to its installation. First, there was not any access to the southern shore of Peachtree Creek at this location for any major equipment, so we had to come from the northern shore. We also had to develop ways to place this 175'-0" central span in one piece, swinging it around and over the creek itself. This plan required the mobilization of one of the largest hydraulic cranes in the Southern US. In addition to hoisting, all concrete needed to be pumped from the north side with the assistance of a 167'-0" long concrete boom/pump truck. This allowed us to place both bridge bents with all future concrete work using a pump hose place on top of the bridge after it was set into its final location.

Construction completed on the southern shore, requiring improvements to the Confluence Trail from the construction zone all the way to the Cedar Chase Private Community. These improvements were designed to impact the existing natural environment as little as possible, but to also allow some smaller vehicular and material access. The JMW teams mulched trimmed trees and branches in-place aiding in soil impacts and erosion throughout the construction process.

# DeKalb-Peachtree Airport 2004 Taxiway Pavement Reconstruction

DeKalb County, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the 2004 Taxiway Pavement Reconstruction in DeKalb County, GA.

JMW's team worked in many locations throughout the air field. The placement of over 9,000 cubic yards of 11" PCC paving was installed as well as modifications to storm sewers, drainage and pavement markings. Other maintenance included airfield electrical pavement markers and asphalt paving. This was the 2<sup>nd</sup> project of this type JMW has successfully completed for PDK airport. Our teams provided these services while working around the flight schedules to complete the revisions. All FAA quality assurances were provided. This project was completed on time and within the budgets set by the county.

## Concrete Statistics

# DeKalb-Peachtree Airport 2002 Pavement Reconstruction at Taxiways "H", "C", & "J" & Runway "2L"

DeKalb County, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for the 2002 Pavement Reconstruction located on Taxiways "H", "C", "J", as well as Runway "2L" in DeKalb County, GA.

Our teams placed over 10,000 square yards of 11" PCC paving at various locations. Teams provided new airfield electrical work, storm drainage, asphalt paving, pavement markings and updates to paving base course. The teams at JMW provided these services while working around the flight schedules to complete the revisions. All FAA quality assurances were provided. This project was completed on time and within the budgets set by the county.

# GDOT NHS-M001-00(411) - District 3

Multiple Locations, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to repair of concrete end walls and replacement and repair of edge beams of 27 bridges in Metro Atlanta, Georgia.

JMW used 4 hour rapid set concrete as well as 24 hour rapid set concrete for this project. The work was located on an active, open highway / interstate system. There was also extensive bridge joint replacement. Limitations on work hours included the need to re-open bridges lanes within 12 hours and 24 hours, depending on location and scope of work. Over 3,480 hours of traffic control was required on this project.

## Concrete Statistics

5,709 LF of bridge joint replacement / repair

## Contract Amount

\$1,480,000

**Building for Generations**

J.M. Wilkerson Construction Co., Inc. was the general contractor for this Design /Build Project in Catoosa County, GA.

The project consisted of the repair / replacement of bridge decks and beams associated with (4) bridges located along north and southbound I-75. JMW also had to demo out existing bridge girders on one of the particular bridges, and install new precast bridge girders, along with other repairs. Time restraints varied by bridge and amount of traffic flow. Some were as short as 12 hours of shut down on lanes, bridges and/or areas affected by this project. JMW ran two (2) shifts and worked 24 hours a day. This project required the use of Accelerated strength concrete in most locations. This work was on one of the highest trafficked roads in the state of Georgia.

On 3 of the 4 bridges, we replaced the bridge deck, edge beams and end walls. On 1 of the 4 bridges, we replaced the entire super-structure along with the bridge deck, edge beams and end walls.

### Concrete Statistics

2,326 cubic yards of concrete placed

# Walton County Bridge

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was the general contractor for the construction of over 4,382 feet off Highway 81 in Walton County, as well as the construction of a new 300 foot long bridge and approaches on SR-81 over the Alcovy River beginning west of Riverglen Drive and extending east of Jack Pittman Road.

This project required over 100,000 cubic yards of excavation, including the 65,000 cubic yards of rock that was excavated. JMW self performed all substructure and superstructure concrete including, but not limited to, footings, pile caps, columns, caps, end-walls, wing-walls, diaphragms, bridge decks and barrier walls. Additionally, we self performed the installation of piling and the erection of precast beams.

# MARTA Bearing Pad Restoration/ Replacement

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was the contractor for the Metropolitan Atlanta Rapid Transit Authority (MARTA) for the renovation, maintenance and repair of the existing elevated transit line's bearing pads in Atlanta, GA.

This project required the elevation of the existing track structural supports and took place after hours and while active traffic was maintained. JMW's team, along with the Engineers of record, developed the lifting structure necessary to facilitate this project. Our teams worked with both MARTA and safety officials throughout the construction process, and completed the project ahead of schedule and within budget. JMW has worked with MARTA for over a decade in the Atlanta market.

# Atlanta Beltline North Avenue Plaza

Atlanta, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the general contractor for a new pedestrian bike/plaza located adjacent to Ponce City Market, located in Atlanta, GA.

The project was a unit price bid for a pedestrian/bike plaza, approximately  $\frac{3}{4}$  acres, developed in the eastside corridor of the Atlanta Beltline, between North Avenue and Ponce De Leon. The plaza was paved with granite pavers, pervious concrete pavement, concrete sidewalks, & granite curbs to provide a public space for users of the Beltline. It also included minor site demolition & clearing, erosion control, grading, bio-retention area with associated piping, storm drainage piping & structures, hardscape/concrete flatwork, retaining walls, stainless steel safety railing w/ mesh infill, site furnishings, site lighting, and landscaping.

The hardscape/site improvement scope included granite pavers, granite curb, concrete sidewalk/pavement, pervious concrete pavement, paver edging, concrete weir-wall with granite veneer, benches, trash receptacles, etc. This project was constructed in accordance with the Davis-Bacon Wage Decision No. GA140009 1/03/2014 and other prevailing wage requirements as well as in accordance with GDOT.

# Berkeley Lake Dam Rehabilitation

Berkeley Lake, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor to complete the restoration of the Category 1, Berkeley Lake Dam project in Berkeley Lake, Georgia.

This earthen dam constructed in 1948 is one of the largest in the state. Its structure was damaged in the historic floods of September 2009 when the city experienced a 500 year storm event. Repair work included installation of an internal drainage and siphon system, installation of a piped drainage system, re-grading of the dam, reconstruction of a portion of River District Drive and installation of associated erosion and sedimentation control measures. The scope of work began with draining the 88 acre lake, including fish removal. This project is on-going and is active within a residential community.

## Erosion Control

# Blue Ridge Dam Rehabilitation

Blue Ridge, Fannin County, Georgia

J.M. Wilkerson Construction Co., Inc. was selected to work with Garney Construction, out of Kansas, MO, to update this significant category 1 structure in Blue Ridge, GA.

Completed in 1931 by the Tennessee Electric Power company (TEPCO) and acquired by the Tennessee Valley Authority in 1939, the Blue Ridge Reservoir consists of an embankment dam, a gated saddle spillway, and additional un-gated spillway, and intake tower, a low level outlet structure, and a power plant. Due to new regional seismic hazard studies, it was determined that remedial measures were required for the intake tower and both upstream and downstream slopes to ensure stability during and after the design seismic event.

JMW was responsible for construction of a new downstream embankment rock berm on the existing downstream face of the dam, modifications and repairs to the existing toe drain system, relocation of underground utilities near the powerhouse, relocation of the powerhouse access road, including the construction of two MSE walls and the removal of portions of the upstream slope of the dam, replacement of aggregate filter materials and riprap. Over 500,000 tons of materials were replaced on the slopes of this structure

## Erosion Control

## Project Information

- One of the Nation's Largest Veteran Cemeteries
- Over 100,000 Man Hours
- Site consisted of over 135 acres
- Over 1.2 Million cubic yards of soil moved
- Over 2 miles of utility piping, water, sewer, storm.
- Over 500,000 cubic yard of rock Excavated
- Constructed over 13,000 feet of roadway and infrastructure
- Constructed a 240 foot long, 4 span bridge
- More than 29,000 full casket gravesites consisting of both pre-placed crypts and traditional casket gravesites
- 3,000 unit columbarium
- 3,000 burial sites for cremation in-ground remains
- Planted over 700,000 square feet of Bermuda sod
- Planted over 2 Million square feet of hydro-seeded Bermuda
- Planted 1.4 Million in permanent Grassing
- Planted over 13,000 trees
- Completed a year ahead of schedule

# Jones Bridge Park Shoreline Restoration

Gwinnett County, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to stabilize the river shoreline through bank armament and bank re-vegetation techniques in Gwinnett County, GA.

Pedestrian trails were upgraded by introducing new concrete and asphalt as well as decomposed granite walkways. Chain link and split rail fencing were also installed. Erosion prevention and mediation, kayak access, access walks to popular river shoals area, reforestation as well as extensive passive using picnicking, seating and hiking facilities, children's playground and covered picnic shelter, signage improvements, demolition of existing decks and construction of a patio overlook complete with stone faced retaining walls, and bridge replacement were also completed.

Erosion Control - Silt Fence, Hay Bales, Ditch Checks, Check Dams, Rip Rap

# Lake Charles Dam Renovation

Roswell, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the Lake Charles Dam renovation project in Roswell, GA.

This category 1 High Hazard Dam renovation project included the removal of existing spillway systems and installation of internal drainage structures from the lake. A new Principle Spillway systems, Consisting of reinforced concrete riser structure and a 60 ft. pre-stressed concrete cylinder pipe was constructed. A new auxiliary spillway, consisting of two articulated block-lined channels were constructed as well. A portion of the embankment was also removed and re-compacted in order to construct the new spillways. New internal drainages systems were installed and sediment accumulations in the lake bed were reduced or removed.

# Murphy Candler Spillway

DeKalb County, Georgia

In Early 2002, J.M. Wilkerson Construction Co., Inc. was contracted to complete modifications to the Murphy Candler category 1 dam located in the Dunwoody area of Atlanta, GA.

Built in the late 1950's, the Murphy Candler dam and park established a 135 acre park. The scope of work completed by JMW included the demolition of a portion of the existing spillway and the construction of an under-drain system. The new installations required grouting of a spillway pipe, construction of a wave protection beam and associated dewatering. Our teams were also responsible for modifications to the dam, erosion, sedimentation and pollution control.

**Building for Generations**

# Piedmont Road Slope Stabilization

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to provide stream bank stabilization and repairs for the Rollins Corporation in Atlanta, GA.

The project included the restoration of a 400 foot long, 35 foot high, Level 2 Preferred Method restoration project with the Georgia EPD. The design showed the reduction of the slope to 2:1, the removal of unsuitable soils and placement of armored stone gabion mattresses. At the conclusion of site work, installation of the tow groins and the placement of live stakes were included. Paving work and installation of drainage structures located in the adjacent parking area conclude the project.

The largest construction challenge occurred in September of 2009 when heavy rains fell in Atlanta. Peachtree Creek rose beyond the 100-year flood level and threatened the stability of the bank. JMW had installed only 1/2 of gabion mattresses at the time and worked affectively to protect the slope from catastrophic failure.

## Erosion Control

Silt Fence, Turbidity Barrier, Gabion Baskets

**Building for Generations**

# Stone Mountain Dam Spillway Replacement

Stone Mountain, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to remove an existing 67-foot wide grouted rip rap spillway in Stone Mountain, GA.

The spillway is located on the south end of the Stone Mountain dam completed in 1965. This category 1 dam created the park's 363 acre lake. JMW replaced the existing spillway with a cast-in-place concrete stepped spillway with a control section and stilling basin. The spillway serves as the principal and emergency system for controlling the dam and lake levels. Completing the project on time was critical, as Stone Mountain Lake hosts the "Scarlet O'Hara" authentic paddlewheel riverboats, and many other recreational functions on the lake. The spillway is essential to controlling the level of the lake for all uses at the facility making this project critical to the parks use and business.

JMW placed over 4,000 cubic yards of concrete in nearly half an acre of surface area. This project was completed in less than seven months, finishing six weeks ahead of schedule.

# Sweetwater Creek Restoration

## McDaniel Farm Stream Restoration and Buffer Enhancement

Gwinnett County, Georgia

J.M. Wilkerson Construction Co., Inc. was the General Contractor for this project in Gwinnett County, GA.

The scope included the restoration of a portion of a tributary to Sweetwater Creek extending from the Sweetwater Creek, mainstream upstream approximately 2,430 ft. to the McDaniel Farm property limit. The project also included planting tree and scrub vegetation along the riparian buffer at Sweetwater Creek mainstream and a second (northern) tributary buffer planting component of the project included approx. 3,000 ft. of low impact pedestrian path and 3 foot bridges (prefabricated) were constructed. Re-vegetation of disturbed sites was also included in this contract.

### Dewatering

Bypass Pumping

### Erosion Control

Silt Fence, Rip Rap, Check Dams, Temporary & Permanent Grassing, Slope Mats

### In-Stream Structures

Riffles, Step pools, J-Hooks, Cross Vanes, Wing Deflectors

### Subcontractors

No Subcontractors were used for grading, stream restoration, storm sewerage, trails or landscaping.

# Brook Run Skate Park

DeKalb County, GA

J.M. Wilkerson Construction Co., Inc. was the General Contractor for the Brook Run Skate Park project located in Dunwoody, GA.

The 27,000 sq. ft. skate facility centered around a new 2,500 sq. ft. building with restrooms, concessions, covered viewing and space for tournament organizers. The entire site, down to the countertops in the vending area, is made from concrete. Shotcrete and concrete were used together on vertical and horizontal planes, which is a relatively new design/application feature. Brook Run Skate Park was a very detail-oriented project, similar to building a 3 acre glass surface. All sides and banks that were shotcreted were templated every linear foot. The fine grading was as perfect as the final concrete itself, with all concrete and joints being perfectly smooth. The clubhouse is fully skateable, with ten overhead doors, which remain open to allow skaters access to the restrooms and snack bar areas.

**Building for Generations**

J.M. Wilkerson Construction Co., Inc. was the general contractor for the Georgia National Cemetery in Canton, GA.

This project is located on 277 acres in Cherokee County, west of Canton, Georgia. The first phase of construction called for the development of 135 acres of the property. The construction of over 13,000 feet of roadway and infrastructure. The construction of a 1,900 sq. ft. visitors center, 2,600 sq. ft. administration building and 8,700 sq. ft. maintenance facility. Additional structural steel committal services buildings, public information and assembly areas for ceremonies were included. More than 29,000 full casket gravesites, a 3,000 unit columbarium and 3,000 burial sites for cremation remains. JMW also constructed a 240 foot long bridge where all substructure and superstructure concrete was self-performed. Additionally, JMW performed the installation of piling and the erection of precast beams. The Georgia National Cemetery is among the largest national veterans cemeteries in the country, and it was completed a year ahead of schedule.

## Compelling Reason To Choose J.M. Wilkerson Construction

### What JMW Brings to the Table:

- Long standing history of successful construction.
- Team has years of concrete and industrial experience.
- Understanding of large and small projects.
- Extensive background in both Commercial and Heavy Construction.
- Sound financial and staffing history.
- JMW's team will devote partner level staff participation throughout the entire development and construction process.
- Available and talented staffing ready to participate.
- Necessary bonding, safety and construction licenses to participate.

J.M. Wilkerson Construction possess the necessary skills and expertise to provide a well coordinated, cost effective solution meeting all of the needs of this project. What we really bring to the table is a team steeped with years of construction experience. We have never failed to complete a project and commit ourselves to deliver the highest quality project possible.

At J.M. Wilkerson we pride ourselves on our communication. To communicate clearly, as well as to document those decisions, is an essential component of every successful project. Portraying our message in written and visual formats is key, but equally important are the people delivering the message. We select a team of experts at a Principal level to execute each project according to the scope of work. JMW takes care at the beginning of each project to assign a team of staff who are best qualified to deliver the best service to our client. We value our clients and allocate staff thoughtfully. The team will be in place from pre-construction until the punch-list phase. The employees of JMW have decades of experience both in the office and in the field. Our people are our biggest asset and deliver outstanding quality for the most competitive price.

Thank you for the opportunity to submit our team's qualifications, please do not hesitate to contact anyone listed with questions or additional information needed for your team's assessment of our company.
