Our Mission

J.M. Wilkerson Construction's mission is to manage the construction process to ensure we give our clients more value than expected in Quality Assurance, Cost Control, Schedule, Performance, Working Relationship and Safety.

Jim Wilkerson
Owner/Chairman

- The JMW commitment extends beyond the construction process. We strive to earn your trust. Trust is the foundation to all successful working relationships.
- We perform our work with integrity. Our word is our commitment, and we never waiver from a commitment we make.
- We take ownership of a challenge. Challenges are inevitable, therefore, if present, we recognize them and take corrective action to ensure a positive end result.
- We work hard to exceed your expectations. This is our mission and our commitment to you.

J.M. Wilkerson Construction seeks long term involvement with our clients. Repeat business from satisfied clients is critical to our success. As partners in the construction process, we work together to reach common goals.

Firm Description

Building for Generations

Company Information

J.M. Wilkerson Construction Co., Inc.
1734 Sands Place - Marietta, Georgia 30067
Primary Contact - Mike Travis
Telephone: 770.953.2659 Fax: 770.933.9665
E-mail: mtravis@jmwilkerson.com
Website: www.jmwilkerson.com

- J.M. Wilkerson has been in Business for over 40 years
- Ownership - Corporation
- State of Residency / Incorporation - Georgia
- Office Location - Marietta, Georgia

Hotel Indigo - Athens, Georgia

Established in 1982 by Jim Wilkerson, J.M. Wilkerson Construction provided tenant interior renovations before expanding into industrial, office, institutional and concrete work. Today, JMW provides a wide array of services and has experience in many building types including, but not limited to, multi-family, historic renovation / adaptive reuse, industrial, tenant interiors, retail, religious, institutional, transportation, hospitality, concrete, rail and environmental projects. Our mixture of commercial and heavy/industrial projects is unique in the Southeastern markets.

The ability to provide services to both major market sectors, allows our teams to work on a wide array of projects. When it benefits a project, JMW can perform sub-contracting work in-house, providing a single source of responsibility and management. This frequently adds genuine value to our team and provides the client with greater protection. JMW's steady growth is based on the continued commitment of Mr. Wilkerson and his employees to provide personal attention and exceptional service to each client. Mr. Wilkerson takes pride in his organization and plays an active role in every project JMW undertakes. This family owned business works hard to maintain its quality and talented staff, many of whom have been with the company for over 40 years.

JMW's President and CEO is Brett Hawley. Brett joined the team in 1994, moving from Kansas City, MO to Georgia. His extensive knowledge in heavy construction complemented JMW's already broad experience base. Brett brought not only heavy civil and construction backgrounds, but commercial, hospitality and estimating knowledge, as well. Brett has helped the JMW team grow many new market sectors providing additional experience for future jobs.

JMW's Vice Presidents are Austin Pruitt, Michael Travis and Chris Griffeth. Austin Pruitt has worked with JMW in various roles and is now the Chief Estimator. Pruitt's knowledge of construction, estimating, and his ability to coordinate subcontractors makes him a valued member of the JMW Estimating Department. Austin works with both our Commercial Construction bids and Heavy Construction Departments and leads most estimating for JMW.

Mike Travis is the leader of the JMW Business Development department. He has been connected to the Design, Construction and Development industry for more than twenty years. As an architect graduating from the University of Oklahoma, he helped to execute and manage over a billion dollars in projects with teams like RTKL, Perkins Will and Smallwood Reynolds Stewart Stewart. His background in architecture, development and construction is critical to JMW's pre-construction efforts and new business pursuits.

As one of JMW's most accomplished project managers, Chris Griffeth has worked on all types of projects and has been with the JMW team for over 10 years. Possessing many strengths in his management, Chris has become quite successful in the administration of HUD or federally funded as well as task order or on-call projects. He has successfully completed multiple projects for the Atlanta Housing Authority, City of Atlanta as well as Federal and Military agencies.

Building for Generations

Services

J. M. Wilkerson Construction offers a well-rounded array of construction services in the following areas:

Pre-Construction Services

Planning and Procurement
Design Review & Value Analysis
Budget and Cost Estimation
Value Engineering
Building Information Modeling (BIM)
LEED or Sustainable Construction Review
Design / Build
Scheduling

Construction Services

Project Management
Cost Control
CM @ Risk
General Construction
Sustainable Construction
Environmental Construction
Heavy /Civil / Concrete Construction
Site & Grading

We take great pride in giving our clients more value than they expect, and to that end, dedicate ourselves to constructing the highest quality product available. Just as significant, are the relationships we develop along the way.

We strive to establish a healthy, respectful relationship that will help us provide the highest level of service, which will continue in the years ahead. This philosophy has remained a consistent thread throughout JMW's 40 years in operation, allowing us to continue "Building for Generations".

J5 - New Luxury Housing

Avondale Hills - New Construction

Hotel Indigo in Athens, GA - LEED Gold

MARTA Grout Pockets - Heavy Construction

Building for Generations

Green Building Experience

The philosophy of sustainability has become a major focus to many owners. This philosophy has also been embraced by both design and construction professionals across the country. With this new emphasis to provide more efficient buildings and practice more sustainable construction, the development of new operating procedures has become essential. The teams at J.M. Wilkerson Construction have been responsible for the construction of over \$97.6 million in completed LEED (Leadership in Energy and Environmental Design) or sustainable projects. These projects have included residential, commercial and industrial types of construction, covering over 225,364 square feet of area.

With this relatively new type of design and construction, our teams have made great strides in obtaining the necessary skills to both document and execute sustainable projects of this type. With LEED accredited professionals on staff at JMW, we have created detailed procedures for tracking projects from creation through implementation. Our teams have been able to achieve tremendous success with respect to sustainability goals on behalf of our owners.

The process and execution of a sustainable project is greatly dependent on the communication skills and involvement of both the design and construction professionals. The earlier these teams begin to review the level of sustainability an owner seeks to achieve, the greater the chances for success. In addition, the decision to develop a sustainable project requires a team to closely review the type of materials specified, the construction staging proposed, the electrical and plumbing designs, as well as, the smaller details throughout the facility.

Our construction teams make every effort to perform and practice sustainability on every project. We work hard to divert construction waste from landfills, and to employ the use of local and recycled materials where possible. We have developed comprehensive Waste Management and Indoor Air Quality Programs, as well as, tracking forms necessary to maintain accurate records for the filing and recording of sustainable data.

In 2009, J.M. Wilkerson Construction won the Sustainability Practice award at the AGC Build Georgia Awards. AGC selected the DeKalb County Central Transfer Station, completed by our teams in 2008. This LEED Certified facility was delivered for just under \$25 million and was one of DeKalb County's first major LEED projects. The facility was situated on an existing brown field and required the removal of over 100,000 cubic yards of unsuitable material and incorporated both industrial and office building structures. The project was completed 4 months ahead of schedule with no owner change orders. More recently completed projects incorporating LEED or sustainable construction practices include the Indigo Hotel located in Athens, GA, CHRIS Kids located in Atlanta, GA, and Charlottetown Terrace located in Charlotte, NC.

Over 1532 tons of waste diverted
On Hotel Indigo - Athens, GA

Deepdene Park Restoration - Atlanta, GA

With the completion of the 93,477 square foot Indigo Hotel, J.M. Wilkerson Construction made history completing the 9th LEED Gold hotel worldwide. This was also the first hotel for Intercontinental Hotels Group (IHG) to reach a GOLD rating within their 4,400 hotels worldwide. This project diverted over 1,600 tons of construction waste from landfills and was constructed in only 12 months. This project won J.M. Wilkerson Construction the 2010 Sustainable Practice award from the AGC, as well as, a ULI award of Excellence.

J.M. Wilkerson Construction was also awarded The Affordable Housing Builder of the Year for Earthcraft Multi-family 2010. This award was presented for work on the CHRIS Kids project. This multi-family housing development devoted to help young adults from prior foster care situations, and was the first of a two-phase project. The award was presented by the Southface Energy Institute and was one of the first Builders Challenge multi-family projects recognized by the U.S. Department of Energy.

The \$11 million LEED Gold Affordable Housing project, Charlottetown Terrace, located adjacent to downtown Charlotte, was completed on time and within the authorities budget by the JMW team as a Construction Manager at Risk.

Charlottetown Terrace had a complex commissioning process where the owners managed the overall process but utilized both outside commissioning agents, as well as, our own team LEED AP to provide the necessary documentation and activities to reach their goal.

We worked with the Charlotte Housing Authorities to set up regularly scheduled meetings where commissioning was outlined, defining roles of responsibility. Team members were assigned specific scopes of work required to reach the LEED goals. JMW was assigned direct commissioning responsibilities that included the coordination and verification of many aspects of the enhanced commissioning process. Our team also provided direct assistance on all final training and verifications, as required by the commissioning process.

Both field and office staff provided reports, submittals and RFI's to the owner's commissioning team. Any changes in the construction documents or material selections required specific reporting to maintain accurate accounts of where the project stood. JMW's team was directly responsible for this coordination with the design team.

We provided all verification for materials, recycling, installation methods and waste reporting. We shared the responsibility with the rest of the owner's team that construction was in-line with the commissioning agent's base building design model. Commissioning meetings and inspections were pro-actively scheduled to include all major milestones for HVAC installation, lighting, roofing, and items that affected the base energy model set by the team.

Other sustainable construction experiences included working with teams like Energy Ace and DeKalb County's LEED consultants for the Indigo Hotel and DeKalb County Transfer Station. Each project had its own unique twist on the Commissioning process but was formatted in a more conventional Owner, Contractor, LEED consultant role. Our LEED and sustainable background offers great benefit and experience to meet the needs of any project.

JMW Teams have Successfully completed more than \$97.6 Million in LEED projects

- Indigo Hotel, Athens, GA - \$15.1 Million - LEED Gold
- DeKalb County Central Transfer Station & Administrative Headquarters - \$24.3 Million - LEED Certified
- CHRIS Kids, Atlanta, GA - \$4.8 Million
- Charlottetown Terrace, Charlotte, NC - \$11.1 Million - LEED Gold
- Imperial Hotel (Historic Affordable Housing Project - \$11 Million - LEED Multi-Family
- Lafayette Sustainable Housing Developments - \$5.7 Million
- Ponce City Market, Atlanta, GA - \$25.6 Million - LEED Silver

J.M. Wilkerson Construction is committed to the execution of innovative and challenging projects. We have made the commitment to provide the highest level of service combined with thoughtful and responsible construction practices.

Building Information Modeling (BIM)

J.M. Wilkerson Construction utilizes Building Information Modeling (BIM) software on almost every project. Understanding the importance of this new technology for our industry, we have devoted full time employees to the development of its benefits, creating BIM models for pricing, clarification and review. In addition, we now work with our clients and design teams developing models that show Conceptual, Marketing, Estimating, Design, Logistical, As-Built Conditions, and Facility Management.

BIM creates a dynamic 3D model of a project which aids in the concept, design, and construction process. It does this through the use of object driven data which includes building geometry, spatial relationships, geographical information, quantities, and the properties of building components. This allows us to visualize, coordinate, predict costs, resolve conflicts, and extract data, before we actually start the construction process. Also, with advances in technology and software, BIM allows us to branch out into 4D encompassing time and scheduling, and into 5D integrating estimating and cost.

BIM has become a major part of our process from the pre-construction phase through final closeout, enabling the owners, design team, and construction team to see the project in a 3D digital model, during all phases of construction. Being able to visualize the project at the conceptual phase, allows us to plan budgets, logistics, and phasing, as well as, to define the scope of work for the individual trades, scheduling around any conflicts seen in the model. This helps reduce costs that may have required rework, change orders, RFI's, and delays to the project.

Using BIM's expansive databases for both quantities and material take-offs, creates a more accurate estimate and aids in the purchasing process. Once under construction, BIM enables the construction managers to better understand the design and accurately plan the remaining steps. It also enables our onsite managers to track the construction schedule through its use of project phasing. Also by tracking changes throughout the project, BIM provides a more comprehensive set of as-built drawings, allowing the end user to manage the facility with a detailed understanding of what was put in place during the construction process.

We strive to contract with Sub-contractors who have BIM resources, but often need to supplement their capabilities with our own expertise. If required by the owner or the project specifications, we will create as-built files that incorporate all structural, mechanical and electrical trades. This tool has become a critical step in our recent success with our sub-contractors, using it on many significant projects.

JMW utilizes the following programs:

- Revit Architecture
- Revit Structure
- Revit MEP
- Auto CAD Civil 3D
- 3DS Max Design
- Navis Works
- QTO
- Auto CAD (Full Suite)

GSU (BIM) Study - Atlanta, GA

Conceptual Models

JMW creates Conceptual Models during the design phase of a project. Our team works with owners and designers to assist in site layouts, test fitting of buildings, orientation, access and many other design related issues. With this model, we can establish early pricing and value engineering, as well.

Conceptual Models provide the owner with marketing or fundraising materials suitable for add campaigns, project interest, and potential investors. JMW has created dozens of models of this type and provides this as part of our basic services on all Design/Build projects.

Clarification Models

Clarification Models are smaller models that outline a specific detail or area of a project. Many projects have a signature element or a highly detailed area that is a visual focal point. We can create a Clarification Model to highlight the details of this specific area for the owner, sub-contractors and construction team. These small, critical models have helped to reduce the number of RFI's and provided needed clarity, reducing the number of questions submitted on our jobs.

Logistics Models

Logistics Models provide our teams with the ability to stage a project and develop the process for material staging, access, hoisting, phasing of work, and safety. Any job with site complexity will require a well-orchestrated Logistics Model. BIM will aid in this development and help streamline the process, as well as, save costs.

Benefits of BIM Logistics Models:

- Development of Access Plans
- Development of Safety Plans
- Positioning of Layout Areas and Lifting Zones
- Phasing or Sequencing Study Review
- Possible Value Engineering

PHASE III

PHASE III WILL NOT BE STARTED UNTIL PHASE II IS COMPLETED AND ANY PERSONNEL, STORAGE, OR INVENTORY CAN BE RELOCATED TO EITHER THE NEW EXPANSION OR THE NEWLY RENOVATED PORTIONS OF THE EXISTING BUILDING. IT IS THE INTENTION OF J.M. WILKERSON CONSTRUCTION TO COMPLETE THIS PHASE IN 28 DAYS. THIS PHASE CONSIST RELOCATING TRAINING EQUIPMENT, DEMOLISHING EXISTING WALLS AND CONSTRUCTION NEW ONES TO RECONFIGURE OFFICE, TRAINING, AND CONFERENCE ROOM AREAS. THIS PHASE ALSO CONSIST OF RECONFIGURING THE RECEPTION AREA WHICH IS PLANNED TO TAKE PLACE OVER A SCHEDULED WEEKEND.

Building for Generations

Personnel Capability

J.M. Wilkerson Construction's commitment to its employees has stayed strong throughout the company's history. JMW currently has over 115 employees. Located at our home office are 16 employees providing project and company management, as well as, estimating, accounting, marketing and administrative activities. Located in the field, providing supervision, are 19 employees. For additional detail see the break down below.

Home Office - 16
Project Engineers - 3

Superintendents - 19
Foremen - 8

Craftworkers - 34
Laborers/Helpers - 35

Safety Information

Safety in all of J.M. Wilkerson Construction's operations is not only a company goal, but a requirement. We create a culture in which safety is a core value. Our commitment is to provide a safe and productive environment for everyone involved with our projects. At no time will safety be compromised because of cost. OSHA standards are met or exceeded at all times.

It is JMW's belief that accidents can be prevented through planning, training and a cooperative effort in all areas of our operations, with our goal being to eliminate all injuries. This goal is accomplished by the following safe working practices on all of our construction sites.

The project managers, superintendents, foremen and safety manager have full support of management in enforcing the provisions of our Safety Policy, as it relates to the responsibilities assigned to them. Prior to start of work, each trade attends a preparatory meeting to discuss the scope of work, its hazards and controls.

Our superintendents and foreman are required to keep their safety training and education current. Each superintendent conducts weekly site safety meetings and inspections. We also utilize available safety resources such as the AGC's Site Safety Training Programs and the Construction Safety Competency Training courses.

JMW is a Drug Free Workplace, certified by the GA Workers Compensation Board.

Required Supervisor Training

OSHA 30 Hour
CPR / First Aid
Confined Space Entry

Industry Affiliations, Memberships, Awards & Honors

Over the years, J.M. Wilkerson Construction has successfully completed many general construction projects for Federal, State, local and private clients. We have completed new construction, adaptive-reuse, historic rehabilitation, environmental, heavy civil, concrete, religious, industrial and tenant work. We pride ourselves on providing only the highest quality services, using the most professional teams possible. Over this history, JMW has been awarded many accolades for their services and successful completion of projects. These awards prove that team work help to make even the most challenging projects accomplishable. Listed below are only a few of the many awards and honors JMW has received.

- 2020 AGC Build Georgia Awards First Place – Bethel Tower Renovation & South Fork Pedestrian Bridge
- 2019 AGC Build Georgia Awards First Place – Wheat Street Tower
- 2018 AGC Build Georgia Awards First Place – Studioplex Commercial Podium
- 2017 AGC Build Georgia Awards First Place – Studioplex Parking Deck, Lake Blackshear Resort Renovations & Juniper & Tenth Renovations
- 2016 AGC Build Georgia Awards First Place/Best Sustainable Building Practices – Ponce City Market – Parcel F Deck, Atlanta Beltline North Avenue Plaza & Lockheed Martin B1 Emergency Stairwell Egress
- 2016 ACI First Place in the Parking Deck Category – Ponce City Market Parcel F Parking Deck
- 2015: AGC Build Georgia Awards First Place – Ponce City Market – The Flats, GA Trust preservation Award for Excellence in Sustainable Rehabilitation – Imperial Hotel
- 2014: AGC Build Georgia Awards First Place - Imperial Hotel, Urban Design Commission Awards Of Excellence First Place - Imperial Hotel, National Housing & Rehabilitation Association Awards Best Historic Renovation using Tax Credits Finalist - Imperial Hotel, Atlanta Regional Commission's Development of Excellence Award - Imperial Hotel, Edson Award for Tax Credit Excellence - Imperial Hotel, NALHFA Exemplary Project - Imperial Hotel, AIA Atlanta Honor Award for Residential Design - Imperial Hotel, APAB Award of Excellence - Imperial Hotel, Preservation's Best Award - Imperial Hotel
- 2013: AGC Build Georgia Awards First Place – The Sweet Auburn Curb Market – Restoration, AGC Build Georgia Awards First Place Best Sustainable Practices – The Sweet Auburn Curb Market – Restoration, Urban Design Commission Awards of Excellence Award First Place – The Sweet Auburn Curb Market - Restoration
- 2012: Non-Profit Building and Design Award from USBGC Charlotte Region Chapter, 2012 Sustainable Business Awards - Charlottetown Terrace, Apartment Renovation of the Year from Multi-Family Executive - Charlottetown Terrace, Green Project of the Year from Multi-Family Executive - Charlottetown Terrace, Design/Build Award Runner Up from DBIA Southeast Region - Hartwell City Hall, Design Award from the City of Decatur - 313 E. College Avenue
- 2011: AGC Build Georgia Awards First Place - CHRIS Kids
- 2010: AGC Build Georgia Awards First Place - Rialto Room, AGC Build Georgia Awards First Place - Hotel Indigo, Athens, GA, AGC Build Georgia Awards First Place - Peachtree Creek Slope Stabilization
- 2009: AGC Build Georgia Awards First Place - Castleberry Point Lofts, AGC Build Georgia Awards First Place - DeKalb County Central Transfer Station, AGC Build Georgia Sustainability Award - DeKalb County Central Transfer Station
- 2008: AGC Build Georgia Awards First Place - MARTA Fare Barriers, AGC Merit Build GA Award - Renaissance Walk at Sweet Auburn
- 2007: First Place Award in the Specialty Category from the American Concrete Institute (ACI) – Brook Run Skate Park, AGC Build Georgia Awards First Place - Georgia National Cemetery
- 2006: AGC Build Georgia Awards First Place - Hardman Farm Phase I Stabilization
- 2004: AGC Build Georgia Awards First Place - Holy Transfiguration Greek Orthodox Church
- 2003: First Place Award from the American Concrete Institute (ACI) - Bus Lot Reconstruction for MARTA Laredo Bus Facility
- 1999: Award of Excellence from the American Concrete Institute (ACI) – Stone Mountain Lake Spillway Replacement, Award of Excellence for Adaptive Use from the Atlanta Urban Design Commission – Swift & Co. Lofts
- 1997 First Place Award in the Mid-Rise Category from the American Concrete Institute (ACI) – The University of Georgia Chemistry Annex Building

Name of Organization	The Vecino Group		
Project Location	Atlanta, Georgia		
Dates of Service	August 2020 – Current		
Project Description	Intrada West Side scope of work entails the demolition of an existing structure, re-grading of the site and the new construction of a 4 story apartment building with a partial basement that contains 143 total units. The first floor contains an approximately 9,000 square foot incidental leased space unfinished “gray box” with the intent for the leased space to infill as a mercantile. Each floor contains a community space and laundry room. The first floor contains a community room along with leasing offices and restrooms. The project in entirety is classified as a VA Building and is sprinkled conforming to NFPA 13. It will also adhere to DCA regulations.

Name of Organization	Jamestown, L.P.
Project Location	Atlanta, Georgia
Dates of Service	August 2013 - 2019
Project Description	JMW has worked on several projects with Jamestown including The Flats Apartments, the Service Building and Parcel F Parking Deck, all of which are located at the new Ponce City Market (PCM) in Atlanta, GA. The Flats is over 330,000 sq. ft. of new residential apartments located inside PCM. The service building project involved the conversion of an old parking structure and service center into new retail projects. The Parcel "F" project consisted of two unique projects. The first project was the stabilization and construction of retaining walls. The second phase of construction consisted of the construction of an 8 story, 168,000 sq. ft. cast-in-place concrete parking structure, events space and vertical connection from North Avenue to the Beltline. Currently, JMW is called upon from time to time for smaller, task order work around the site.

Business History

J.M. Wilkerson Construction
Co., Inc.
Owner/Chairman 1982 – Present

Holder Construction Company
Superintendent 1972 – 1981

U. S. Army
1st Lieutenant,
Corps of Engineers
1968 - 1971

Jim Wilkerson learned solid values growing up in rural Kansas, graduating from Kansas State University in 1968. He also learned valuable life and construction skills serving three years as an officer in the U.S. Army, Corps of Engineers. After graduating from Kansas State University, he worked for Atlanta-based Holder Construction Company for ten years. He won Holders' coveted Superintendent of the Year Award on two separate occasions, and he appreciated the opportunity to get involved with both large and small projects with such a reputable company.

In 1982, at the age of 35, Jim Wilkerson started J.M. Wilkerson Construction Co., Inc. He has overseen over \$500 million worth of construction in those years. He feels one of his greatest accomplishments has been putting a great team together - one that can manage through good times as well as adversity. Jim Wilkerson has always believed the success of a business depends on the quality and performance of its people. JMW has always prioritized the recruitment of the best quality employees and encourages continuous improvement through training and learning new developments in the industry to improve client satisfaction.

Mike Travis has been connected to the design and construction industry for more than 23 years. As an Architect, he worked on over a billion dollars worth of construction projects. As a Developer/Owner's Representative, Mike oversaw hundreds of millions of dollars worth of work put in place for private equity teams, facilitating both the design and entitlement processes. Now, as a General Contractor, he has a wealth of knowledge, matched by few. This allows him to act as a bridge between Developer, Design Team and Construction Team. This coordination role has been very valuable as one of our leaders in our pre-construction activities and throughout the construction process.

Lake Blackshear Resort Rehabilitation

Cordele, Georgia

J.M. Wilkerson Construction Co., Inc. served as the general contractor for the Lake Blackshear Resort in Cordele, GA.

The Lake Blackshear Resort project is an approximately 65,000 sq. ft. resort located on Georgia Veterans Memorial Park. The first building in need of renovation was a one story space, used primarily as a conference center. The other building was a 3 story lodge. The scope of work included new finishes and drop ceiling in the conference center as well as replacing windows/window sills. It also included new finishes, indoor pool fill-in, balcony demolition, reskinning the exterior, new windows, and various other renovation items in the lodge. This project finally included new finishes and windows in 8 individual villas.

Ponce City Market Service Building

Atlanta, Georgia

JM. Wilkerson was selected to provide construction services for the adaptive-re-use of the old Sears Service Building located on the corner of North Ave and Glen Iris in Atlanta, GA.

The project involved the conversion of an old parking structure and service center into a new and vibrant retail project adjacent to the Ponce City Market building. With over 52,000 sq. ft. of retail and 48,000 sq. ft. of parking, this project helps to anchor the corner of the Ponce City Market site. Additionally, the project included the shell space for a 23,000 sq. ft. urban school. The service building's scope of work included the restoration and placement of new concrete structures as well as the finishing out of sales centers and retail locations along North Ave. Other portions of the retail areas were delivered as shell space. Waterproofing of existing basement walls and the installation of a catchment basin was also completed. This was a complex project requiring completion while new tenants opened their companies and were active for business. Additionally, the project was completed as part of the total Ponce City Market package requiring extensive coordination with multiple teams.

Braelinn Village

Peachtree City, GA

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the redevelopment of the Braelinn Village Shopping Center located in Peachtree City, GA.

This complex renovation consisted of the total replacement of over 2,000 feet of existing wall façade including new framing, brick, EIFS and storefront window systems. Additional scope included over 240,000 sq. ft. of roof replacement, extensive site work and paving throughout. New landscaping and public pedestrian areas were also created to enhance the public shopping experience. The exterior renovation included the addition of 18 helical piers ranging in depths from 39 to 120 feet, all of which were installed inside open businesses, during normal business hours. This project was completed in phases to maintain access for tenants and patrons.

Building for Generations

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for renovations to the Doubletree Hotel Buckhead, located in Atlanta, GA.

Renovations will take place throughout the entire facility in ongoing phases. Phases 1 and 2, which are now complete, of this complex project included total renovations to the lobby, bar, sales center and public spaces. Phase 3, included the total renovation of 230 guest rooms and corridors. The complex renovation of this urban hospitality project took place while the facility remained open, occupied and ready for business. JMW understands the importance of maintaining a low profile during renovations in a hotel and work hard to maintain a professional environment for all visiting guests.

Hotel Indigo - LEED "Gold"

Athens, GA

J.M. Wilkerson Construction Co., Inc. was the general contractor for the Hotel Indigo located in Athens, GA.

This project included the new construction of a five story 93,447 sq. ft. boutique hotel. The structure is a hybrid of post tension concrete, load bearing masonry and hollow core plank construction. This 130 guest room hotel is the first LEED-Gold hotel for IHG and the 9th LEED-Gold hotel in the world. The project diverted over 1,532 tons of waste, used over 46% of locally produced materials, saved more than 30% of its water usage over similar projects and used over 28% of recycled content. JMW completed this complex project on time and within budget .

Wheat Street Towers

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for the renovations of the Wheat Street Towers in Atlanta, GA.

This project is a renovation of an existing 208 unit, 14 story apartment tower located on Auburn Avenue, in the Martin Luther King Jr. historic district of Atlanta. The renovation is targeted for elderly housing. There are no building height modifications and no modifications to the existing structural system.

Interior work included the renovation of the units and common spaces, replacing HVAC equipment, water piping and fixtures, interior finishes, window replacements, electrical wiring and fixtures. Exterior work was limited to window replacement, painting of the existing façade, new roof and adding a trellis to the west façade. Site work was limited to resurfacing the parking areas, providing a new dumpster pad, new fencing, new site furnishings, new generator and landscaping. No grading was required. This was a HUD project and all the protocols were executed according to HUD.

Juniper & 10th High-Rise Renovation

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for the renovations of the Juniper & 10th high-rise in Atlanta, GA.

This Senior Housing rehab is located on the corner of Juniper and 10th Ave., right in the heart of Midtown, Atlanta. The very tight site is less than .66 of an acre and includes a 14 story, 149 unit building totaling about 101,000 square feet of heated space. The scopes covered all public spaces, dwelling units, offices and site amenities. Additional project scope included the removal and replacement of the building's exterior skin, windows and all roofing materials. The new exterior skin and wall system was comprised of a new 6" metal stud system faced with a fluid applied water proofing and EIFS skin. All building systems were updated throughout with the removal and replacement of all Mechanical, Electrical and Plumbing systems. Life safety upgrades included new Fire alarm, sprinkler system, pressurizations of stairwells and back-up generators. Site and infrastructure work surrounding this site involved storm water detention and new exterior public spaces.

Casa Los Pinos – Renovations & Additions

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for both interior and exterior renovation/rehab of the existing Casa Los Pinos Apartments complex in Atlanta, GA.

While this property remained open and occupied, our teams updated 230 units of the 386 unit complex, as well as the clubhouse and amenities areas. The scope of work included the replacement of over 1,500 windows, doors, cabinets and millwork. Our teams corrected structural problems, updated paving and drainage issues, and painted all 30 buildings throughout the site. Amenity areas consisted of pool and exterior updates to the clubhouse. This project was completed on time and within the owner's budget. Throughout the process, our team coordinated with on-site management, as well as newly leased tenants.

Building for Generations

Castleberry Point Lofts

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was the general contractor for the Castleberry Point Lofts located in downtown Atlanta, GA.

This building is a 4 story, wood structure consisting of 160,945 sq. ft. of residential space, a 93,000 sq. ft. parking deck and 35,384 sq. ft. of retail space at the street level. This multi-family project has 108 residential units with amenities that include an exercise/club room and a swimming pool located on the roof of the parking deck. The courtyard space includes a water feature and is accessible from the parking deck, street and commercial areas.

This project not only included traffic control and pedestrian safety measures, typical of an urban project, but also took in to account the neighboring fire station. As a result, the requirements to keep the one way street open around the perimeter of the project required continuous coordination with the City of Atlanta's Traffic Department and fire station.

Lafayette Sustainable Housing Developments

Lafayette, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the construction of the new Sustainable Housing development for the Lafayette Housing Authority located in Lafayette, Georgia.

The project consisted of the construction of 30 housing residential units in 15 duplex buildings on two sites. The sites are located on: (1) Foster Circle; and (2) South Steele Street near its intersection with Culberson Avenue. The project is pursuing certification under the LEED for Homes (LEED-H) program.

The duplex buildings total approximately 33,816 sq. ft. of heated space and were constructed of wood framing with cementitious siding and brick and cast stone accents. The demolition and abatement of multiple buildings located at each site was required. Unsuitable soil removal took place at each site and replaced with new structural fill. The project also consisted of parking, site concrete, landscape, hardscape pervious concrete, site grading and utilities, abatement and demolition. The teams completed the project on time and within the owners budgets.

Ponce Springs Lofts

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. served as the general contractor for Ponce Springs Lofts located in downtown Atlanta, GA.

This challenging project was the third phase of the Glen Iris Projects. This building, situated in a very busy area of Midtown Atlanta, is a 5 story Epicore and concrete structure with an attached precast parking deck. The project contains 112 Lofts and 17,000 sq. ft. of street front retail space located on the first floor. The building surrounds a landscaped courtyard complete with fountain on all 4 sides. This project was finished 2 months early and delivered at the development team's budget.

Renaissance Walk at Sweet Auburn

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. completed the new construction of Renaissance Walk at Sweet Auburn in Atlanta, GA.

The scope of work for this project included a total of 158 condominiums, 24,154 sq. ft. of retail space, 15,000 sq. ft. of structural steel framing and over 300,000 sq. ft. of cast-in-place concrete with a precast parking deck. The facades of several of the existing buildings were salvaged and utilized for this project. JMW also constructed around an existing historical building without altering it in any way. Demolition for this project included the historic Palamont Hotel. This project included a swimming pool and tennis court.

Oakland Cemetery Bell Tower Renovation

Atlanta, Georgia

J.M Wilkerson Construction Co., Inc. has been selected as the general contractor for the Historic Oakland Cemetery Bell Tower Renovation located in Atlanta, GA.

This exciting project consists of two floors, plus a basement receiving vault and tower belfry, currently totaling approximately 1,400 SF of conditioned area. The Bell Tower was originally constructed in 1899, adding porch structures and windows at a later date. The scope of work includes the renovation and repositioning of the building in order to accommodate new event space(s), increased accessibility as well as upgraded restrooms and building systems. Portions of the building will be restored to previous appearance. The basement vault will be enclosed to be used as an office. Level 1 will be rearranged to include a main event space, bathroom and flex space. Level 2 will be opened up to create a larger space for events and bathroom. The existing porches that are currently conditioned will have new openings and a new roof, and will be used as outdoor space.

Circulation will be improved with a monumental stair connecting the event spaces on Levels 1 & 2. A new elevator will be installed to provide ADA access to Levels 1 & 2.

The Imperial Hotel - Restoration / Additions

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the interior and exterior renovation/rehab of the existing Imperial Hotel, located in downtown Atlanta, GA.

This 1910 historic hotel, listed in the National Registry, is our second major project with Columbia Residential. The building is approximately 58,780 sq. ft. with 9-Stories. This challenging urban rehabilitation included a complete interior demolition to accommodate the build-out of 90 new residential apartment units. Interior work included finishing out new amenity and public spaces, reception areas, community rooms and management offices. Renovations also included new unit layouts, plumbing, electrical, HVAC, and finishing. Exterior work included restoration of the building along with replacement of all windows, and stabilization of all façade details. This project was awarded LEED Gold certification.

A & P Lofts

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was commissioned to convert the 881 Memorial Drive building into 60 residential loft apartments in Atlanta, GA.

This building was originally built in the 1930's and served as a base for the Atlantic & Pacific Tea Company (A&P Grocery) southeastern operations and a bakery until 1976. Today, this building is on the Georgia Register of Historic Sites and is officially a local landmark. All construction had to operate within the guidelines set forth by the National Register of Historic Places. Each loft unit is unique and was designed and constructed to enhance the modernistic 1930's architecture of the building. The building includes details such as exposed brick walls and floors, industrial windows and wide and bright hallways that compliment the buildings soaring ceiling heights. The Owner received historic tax credits for this project.

The Deere Building Lofts

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the loft conversion of the historic John Deere Plowing Co. in Atlanta, GA.

Built in 1914, this building was converted into 49 upscale residential loft apartments. The composite of the building was heavy structural timbers that were saved and used to enhance each of the spaces. JMW's team did a total renovation by clearing the entire interior of the warehouse, adding an elevator and providing parking on the lower level of the building. The Deere Building is a 5 story building with 2 floors below the ground level. The ceilings in the lofts range from 12 to 30 ft., and the sizes of the lofts range from 588 to 1,600 sq. ft. The bottom level of the building is designated for parking and storage used by the residences. This project is located in the historic Castleberry district where JMW has completed over \$30 million in successful projects. The development was completed on-time and within the owners budgets.

309 East College - 2011 Preservation Award

Decatur, GA

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor to reconstruct 309 East College Ave located in Decatur, GA.

This early 1920's retail structure, that sits at one of the main access points to the City of Decatur's downtown district, suffered a major fire in late 2009, leaving the remaining structure in an unsafe condition. JMW worked directly with the owner to assist in insurance settlements and collaborated with the design team for the completion of working drawings and specifications. After sitting for over a year, our teams were able to help kick off the project's re-development. The building was rebuilt using historic details and load bearing masonry walls. Steel and wood timbers made up roof structures and custom built wood storefront window systems mimicked previous window details. This project was completed ahead of schedule, allowing long displaced tenants to begin their operations and reactivate this section of Decatur.

Fairlie-Poplar Lofts

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. converted the historical Fairlie-Poplar retail building into lofts in Atlanta, GA.

The composition of the building consisted of a wood structure with structural steel supports. Whole floor areas were removed to allow for code egress regulations as well as to facilitate structural repairs. All surfaces were replaced with new finishes. The existing windows, that were intact, were refurbished and the new ones were made to resemble the existing windows as requested by the Historical Society.

With close coordination between the owner and architect, the renovations were completed in time for the 1996 Atlanta Olympic Games and qualified the owner for a tax credit from the City of Atlanta. The Fairlie-Poplar project received awards for the Georgia Trust Historical Preservation of the Year as well as Outstanding Rehabilitation Project for the City of Atlanta in 1996.

Flowers Building

Columbus, GA

J.M. Wilkerson Construction Co., Inc. was the general contractor for this restoration and conversion project in Columbus, GA.

The 4 story building already contained commercial tenants on the ground floor, but the top 3 floors had been boarded up for 25 years. The building required a complete replacement of all systems as well as a new roof and repair and/or replacement of all exterior windows. The corridors were retained in their historic outline with old transoms and doors being retained. The top 3 floors of this building were converted to 18 loft apartments. The apartments range from 730 sq. ft. to 1,800 sq. ft. The lofts have old pressed tin ceiling tiles and skylights incorporated in the design. All work was done under the historic restoration guidelines of the Secretary of the Interior and this project qualified for Historic Rehabilitation Tax Credits.

Hardman Farm - Phase I Stabilization

Helen, Georgia

J.M. Wilkerson Construction Co., Inc. was the general contractor for Hardman Farm Phase I Stabilization project in Helen, GA.

This project was located on a 170 acre historic farm located in Helen Georgia and consisted of the stabilization of 23 buildings including a 7000 square foot, two story timber framed dairy barn that was leaning to one side by more than 18 inches. Each building was stabilized using period detailing and materials and with the long term preservation of the site in mind. JMW also stabilized a landmark gazebo that was located on the top of an Indian Mound that was believed to have been built between 800 and 1450 A.D. This project was completed on time and within the Georgia Department of Natural Resources budget.

Sweet Auburn Curb Market Renovations & Restoration

Atlanta, GA

J.M. Wilkerson Construction Co., Inc. was selected as the Design / Build contractor for the renovations and restoration of the historic 1924 Sweet Auburn Curb Market, known originally as the Municipal Market of Atlanta, in Atlanta, GA.

Renovations included improvement of the base building systems, the replacement of over 160 tons of HVAC equipment, and the retrofitting of lighting throughout the entire facility. Improvements were made to electrical, plumbing, fire and security systems, as well as the renovation of all restroom facilities. Additional work to the interior included paint throughout the entire facility, as well as cleaning of all ductwork, framing and surfaces. Exterior restoration included all of the exterior façade, overhangs and brick surfaces. This work also included the removal of all non-original steel canopies, removal of paint applied to the historic brick surfaces, as well as, window and door restoration. Concrete repair work along with steel handrails and doorways were also included in the scope of work. All of this work took place while the market remained open. JMW facilitated all drawings, permitting and historic approvals.

The scope of work for this project included the interior demolition of an existing two story office space and the construction of new interiors to accommodate a 22,000 sq. ft. private school. The project featured the addition of a new exterior stairway, state of the art classrooms, laboratory space and performing arts room with AV functions throughout. This project incorporated unique interiors, utilizing bright colors, storefront garage door systems for wall partitions and custom millwork designed to be used as part of the performing arts program. Integration of the new exterior stair to the existing building allowed the teams to connect the two pre-existing floor plates unifying the overall flow of the student population.

J.M. Wilkerson Construction Co., Inc. was the general contractor for this sports arena and sports annex that served as the 1996 Olympic Badminton Venue in Atlanta, GA.

The scope of work for this project integrated extensive demolition, including the slab on grade and drilling into the existing pile caps in order to support the two level addition. All work was performed by hand, as it was located within the confines of the existing building, requiring all materials to be brought through the existing narrow entrance way. JMW poured two elevated slabs and blocked in the exterior wall facing the pool. In the existing gym, new flooring and lighting were installed, and the facility was repainted for the Olympics. All rollaway bleachers were refinished, as well.

Reinhardt College Dobbs Building Renovation Waleska, GA

J.M. Wilkerson Construction Co., Inc. was selected to complete the renovation, restoration, and additions to the historic 1926 Dobbs classroom building, located on the campus of Reinhardt College in Waleska, Georgia.

This challenging project included the renovation of all interior rooms, as well as exterior windows, building elevations and the surrounding site. New additions included labs, classroom spaces, and lecture halls. New entryways were completed along with site modifications to provide better access for students and faculty. The project was completed within the six month schedule and within the college's budget. This was one of six projects that the JMW teams completed on behalf of Reinhardt College.

Building for Generations

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the John H. Sr. and Ethel C. Bennett History Museum, located on the campus of Reinhardt College in Waleska, Georgia.

The Museum is modeled after Native American dwellings similar to those once found in the north Georgia area. The Museum consists of an Iroquois longhouse between two Mississippi mound buildings. The 50 foot longhouse was designed to resemble the bark once used to build these dwellings. African tile was used to resemble a dirt floor. Poles of Southern yellow pines were used to hold up the 25 foot arched ceiling. The Mississippian houses were built with stucco to resemble the "wattle and daub" technique once used in their construction. The museum houses several permanent displays with gallery space available for traveling exhibits. The museum has classrooms, laboratories and a 100 seat state of the art theater.

Building for Generations

J.M. Wilkerson Construction Co., Inc. served as general contractor for the William W. Fincher Jr. and Eunice L. Fincher Visual Arts Center located on the Reinhardt College Campus in Waleska, GA.

The Visual Arts Center is an Italianate building with stucco exterior and front and rear porticos. It consists of 7,000 sq. ft. of finished space and includes a computer lab/photo studio, a printmaking and photo studio, a drawing studio and a painting studio. The studios, faculty offices, photographic darkroom and support facilities are positioned around two display galleries. The "loggia grande" is a replica of the main hall of the famed Villa Forni-Cerato near Venice, Italy, providing an area for traveling art exhibitions. The William W. Fincher Jr. and Eunice L. Fincher Visual Arts Center was dedicated in 1998.

The University of Georgia Chemistry Annex Building

Athens, GA

J.M. Wilkerson Construction Co., Inc. served as the General Contractor for the Chemistry Annex Building at the University of Georgia in Athens, GA.

The annex building houses the Computational Quantum Chemistry and the Computational Center for Molecular Structure and Design. The site was steeply sloped with multiple underground utility and pedestrian crossings. The structure was constrained by the need to match floor levels of an existing building. The architect's solution for this was to raise the building above the interference on six large concrete columns. The unique geometry and exposed structure posed a challenge in construction. The design is a reinforced two and a half story concrete structure, encompassing a total of 20,800 sq. ft. The exterior skin of the building is primarily an aluminum glazed storefront.

The Rialto Room - LEED "Gold"

Athens, GA

Within the Hotel Indigo, located in Athens, GA, is an exciting music and entertaining venue that J.M. Wilkerson Construction Co., Inc. developed as a second project.

The Rialto Room, named for the legendary Rialto Ballroom in Liverpool, England, was built in less than 5 months. This unique and complex interiors project included custom bar and millwork details, hand cut stone and many different types of wall and floor finishes. In addition to the finished spaces, a state of the art sound and lighting system was installed in the listening room. This interior build-out followed the same sustainable construction practices demanded by the LEED-Gold Hotel Indigo project. Today, the Rialto Room is home to some of the nation's best music acts and serves as an events venue for both hotel and private parties.

Brook Run Skate Park

DeKalb County, GA

J.M. Wilkerson Construction Co., Inc. was the General Contractor for the Brook Run Skate Park project located in Dunwoody, GA.

The 27,000 sq. ft. skate facility centered around a new 2,500 sq. ft. building with restrooms, concessions, covered viewing and space for tournament organizers. The entire site, down to the countertops in the vending area, is made from concrete. Shotcrete and concrete were used together on vertical and horizontal planes, which is a relatively new design/application feature. Brook Run Skate Park was a very detail-oriented project, similar to building a 3 acre glass surface. All sides and banks that were shotcreted were templated every linear foot. The fine grading was as perfect as the final concrete itself, with all concrete and joints being perfectly smooth. The clubhouse is fully skateable, with ten overhead doors, which remain open to allow skaters access to the restrooms and snack bar areas.

J.M. Wilkerson Construction Co., Inc. was the general contractor for the Georgia National Cemetery in Canton, GA.

This project is located on 277 acres in Cherokee County, west of Canton, Georgia. The first phase of construction called for the development of 135 acres of the property. The construction of over 13,000 feet of roadway and infrastructure. The construction of a 1,900 sq. ft. visitors center, 2,600 sq. ft. administration building and 8,700 sq. ft. maintenance facility. Additional structural steel committal services buildings, public information and assembly areas for ceremonies were included. More than 29,000 full casket gravesites, a 3,000 unit columbarium and 3,000 burial sites for cremation remains. JMW also constructed a 240 foot long bridge where all substructure and superstructure concrete was self-performed. Additionally, JMW performed the installation of piling and the erection of precast beams. The Georgia National Cemetery is among the largest national veterans cemeteries in the country, and it was completed a year ahead of schedule.

Building for Generations

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor to build the new educational addition at the First Baptist Church of Roswell in Roswell, GA.

This 3 story steel and brick structure consisting of a little over 35,000 square feet included classrooms, offices, choir rooms, children's nurseries and offices. In addition to site work and parking areas, the construction of a new covered drop off area and walk way was built. This work took place while the church remained open and active for use and service and was completed on time and within the congregation's budgets

J.M. Wilkerson Construction Co., Inc. served as the general contractor for the Greek Orthodox Diocesan Center of Atlanta in Atlanta, GA.

The Greek Orthodox Diocesan Center project a 36,000 sq. ft. stand alone building located on their Claremont complex. This multi-story structure was built out of steel and loadbearing steel studs and finished with a highly interior and exterior finish consisting of brick, stucco, plaster and copper. The project included the construction of a new atrium, chapel, meeting rooms, offices and living quarters. Interior fresco paintings, guild work and millwork completed this small but complex structure. The teams at JMW completed the project on time and within the Diocese budgets.

Building for Generations

St. Andrews Episcopal Church

Peachtree City, GA

J.M. Wilkerson Construction Co., Inc. was contracted to build a new sanctuary for St. Andrews Episcopal Church, located in Peachtree City.

The steel, wood and timber structure was constructed and added to the site of the existing church. The client's goals were based on the need to add additional facilities to accommodate their growing congregation. They were interested in retaining various parts of the structural components, while building a new facility in the style of an English Country Church. This new 21,000 sq. ft. facility provided a new sanctuary as well as some gathering and meeting areas. The project was completed on time and within the budget.

General Mills Concrete Curbs, Panels & Door Package

Covington, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for the General Mills Concrete Curbs, Panels & Door Package Project in Covington, GA.

This challenging project took place inside the existing Covington facility in the Delta Building. Our teams worked 7 days a week, two shifts, to install new concrete curbs / foundations that varied from 6" to 2'-0" tall. Each curb was used as the base for new insulated metal panel walls, that ranged in size and material from fire partitions to stainless steel.

Additional scope included the installation of industrial doors, (speed doors, role-up doors, man and bump doors). Equipment pads and new openings through existing pre-cast walls were also added.

The JMW teams are currently working inside the plant and are targeted to complete this project on time and within the budgets.

Ponce City Market Parcel "F" Projects

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. served as the general contractor for the new Ponce City Market Parcel "F" retaining walls and parking deck in Atlanta, GA.

The Parcel "F" project consisted of two unique projects. The first project was the stabilization and construction of retaining walls, which are located on the Southern sections of the Ponce City Market site. The JMW team worked to Design/Build a tieback wall capable of shoring up an existing cast-in-place retaining wall. It runs along the south section of the project. This wall was then used as foundations for an MSE wall, extending an additional 14'-0" up to the Beltline Plaza, located above this site.

The second phase of construction consisted of the construction of an 8 story, 168,000 sq. ft. cast-in-place concrete parking structure, events space and vertical connection from North Avenue to the Beltline, located adjacent to the site. This new concrete structure was designed and constructed to hold up an additional 15 possible stories for future development.

South Fork Pedestrian Bridge

Atlanta, Georgia

J.M Wilkerson Construction Co., Inc. was selected as the General Contractor for the construction of the South Fork Pedestrian Bridge in Atlanta, GA, on behalf of the South Fork Conservancy.

This new pedestrian bridge will help to connect the Path 400 project with the existing South Fork Confluence trail as well as the Meadow Loop Trail and Cheshire Farm Trail. This 175 foot central span bridge jumps Peachtree Creek, just East of Piedmont Road and adjacent to the I-84 / 400 South Merge. It provides a safe and exciting way to expand all of the various trails it will impact.

This project had many unique limitations as well as challenges to its installation. First, there was not any access to the southern shore of Peachtree Creek at this location for any major equipment, so we had to come from the northern shore. We also had to develop ways to place this 175'-0" central span in one piece, swinging it around and over the creek itself. This plan required the mobilization of one of the largest hydraulic cranes in the Southern US. In addition to hoisting, all concrete needed to be pumped from the north side with the assistance of a 167'-0" long concrete boom/pump truck. This allowed us to place both bridge bents with all future concrete work using a pump hose place on top of the bridge after it was set into its final location.

Construction completed on the southern shore, requiring improvements to the Confluence Trail from the construction zone all the way to the Cedar Chase Private Community. These improvements were designed to impact the existing natural environment as little as possible, but to also allow some smaller vehicular and material access. The JMW teams mulched trimmed trees and branches in-place aiding in soil impacts and erosion throughout the construction process.

CSX Bridge Replacement

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for Bolton Road Bridge beam replacement for CSX Rail in Atlanta, GA.

This small but complex project required the shut down of both an active rail line and roadway below. The project included a total beam replacement as well as the installation of handrails, structural and sole plates. The JMW team was required to lift and place the new beam between 2 high power lines and with-in ½" of clearance on each side of the abutments. The work on this project was scheduled to take place over a weekend to minimize the impact on both rail and road traffic. The project was completed on-time and within the budgets.

Georgia DOT Bridge Replacement

Catoosa County, Georgia

J.M. Wilkerson Construction Co., Inc. was the general contractor for this Design / Build Project in Catoosa County, GA.

The project consisted of the repair / replacement of bridge decks and beams associated with (4) bridges located along north and southbound I-75. JMW also had to demo out existing bridge girders on one of the particular bridges, and install new precast bridge girders, along with other repairs. Time restraints varied by bridge and amount of traffic flow. Some were as short as 12 hours of shut down on lanes, bridges and/or areas affected by this project. JMW ran two (2) shifts and worked 24 hours a day. This project required the use of Accelerated strength concrete in most locations. This work was on one of the highest trafficked roads in the state of Georgia.

On 3 of the 4 bridges, we replaced the bridge deck, edge beams and end walls. On 1 of the 4 bridges, we replaced the entire super-structure along with the bridge deck, edge beams and end walls.

Blue Ridge Dam Rehabilitation

Blue Ridge, Fannin County, Georgia

J.M. Wilkerson Construction Co., Inc. was selected to work with Garney Construction, out of Kansas, MO, to update this significant category 1 structure in Blue Ridge, GA.

Completed in 1931 by the Tennessee Electric Power company (TEPCO) and acquired by the Tennessee Valley Authority in 1939, the Blue Ridge Reservoir consists of an embankment dam, a gated saddle spillway, and additional un-gated spillway, and intake tower, a low level outlet structure, and a power plant. Due to new regional seismic hazard studies, it was determined that remedial measures were required for the intake tower and both upstream and downstream slopes to ensure stability during and after the design seismic event.

JMW was responsible for construction of a new downstream embankment rock berm on the existing downstream face of the dam, modifications and repairs to the existing toe drain system, relocation of underground utilities near the powerhouse, relocation of the powerhouse access road, including the construction of two MSE walls and the removal of portions of the upstream slope of the dam, replacement of aggregate filter materials and riprap. Over 500,000 tons of materials were replaced on the slopes of this structure

Building for Generations

Project Information

- 30 acres of complex site and infrastructure work
- Imported over 250,000 cubic yards of structural fill material
- Removal of 100,000 cubic yards of unsuitable soil
- Installation of the complex web of utilities for water, sewer and storm system
- Installed over 10,000 cubic yard of concrete
- Addition of four (4) new Buildings
- One of the first industrial LEED projects for DeKalb County, GA
- Completed four (4) months ahead of schedule with no Owner Change Orders

East Conway Dam and Stream

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the General Contractor for modifications to the East Conway Dam and Stream located in Atlanta, Georgia.

This early earthen dam and lake had become silted in and was in need of removal and restoration. JMW's scope of work included a controlled release of all existing water through an installed spillway, restoration of the original stream bed and installation of structural fill suitable for new building construction where lake areas once occupied. This small but challenging project required both experience with dam construction/removal as well as stream restoration and heavy civil construction.

Project Information

- One of the Nation's Largest Veteran Cemeteries
- Over 100,000 Man Hours
- Site consisted of over 135 acres
- Over 1.2 Million cubic yards of soil moved
- Over 2 miles of utility piping, water, sewer, storm.
- Over 500,000 cubic yard of rock Excavated
- Constructed over 13,000 feet of roadway and infrastructure
- Constructed a 240 foot long, 4 span bridge
- More than 29,000 full casket gravesites consisting of both pre-placed crypts and traditional casket gravesites
- 3,000 unit columbarium
- 3,000 burial sites for cremation in-ground remains
- Planted over 700,000 square feet of Bermuda sod
- Planted over 2 Million square feet of hydro-seeded Bermuda
- Planted 1.4 Million in permanent Grassing
- Planted over 13,000 trees
- Completed a year ahead of schedule

Jones Bridge Park Shoreline Restoration

Gwinnett County, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to stabilize the river shoreline through bank armament and bank re-vegetation techniques in Gwinnett County, GA.

Pedestrian trails were upgraded by introducing new concrete and asphalt as well as decomposed granite walkways. Chain link and split rail fencing were also installed. Erosion prevention and mediation, kayak access, access walks to popular river shoals area, reforestation as well as extensive passive using picnicking, seating and hiking facilities, children's playground and covered picnic shelter, signage improvements, demolition of existing decks and construction of a patio overlook complete with stone faced retaining walls, and bridge replacement were also completed.

Erosion Control - Silt Fence, Hay Bales, Ditch Checks, Check Dams, Rip Rap

Subcontractors

No Subcontractors were used for grading, stream restoration, storm sewerage, trails or landscaping.

Lake Charles Dam Renovation

Roswell, Georgia

J.M. Wilkerson Construction Co., Inc. was selected as the general contractor for the Lake Charles Dam renovation project in Roswell, GA.

This category 1 High Hazard Dam renovation project included the removal of existing spillway systems and installation of internal drainage structures from the lake. A new Principle Spillway system, consisting of reinforced concrete riser structure and a 60 ft. pre-stressed concrete cylinder pipe, was constructed. A new auxiliary spillway, consisting of two articulated block-lined channels, was constructed as well. A portion of the embankment was also removed and re-compacted in order to construct the new spillways. New internal drainage systems were installed and sediment accumulations in the lake bed were reduced or removed.

Murphy Candler Spillway

DeKalb County, Georgia

In Early 2002, J.M. Wilkerson Construction Co., Inc. was contracted to complete modifications to the Murphy Candler category 1 dam located in the Dunwoody area of Atlanta, GA.

Built in the late 1950's, the Murphy Candler dam and park established a 135 acre park. The scope of work completed by JMW included the demolition of a portion of the existing spillway and the construction of an under-drain system. The new installations required grouting of a spillway pipe, construction of a wave protection beam and associated dewatering. Our teams were also responsible for modifications to the dam, erosion, sedimentation and pollution control.

Piedmont Road Slope Stabilization

Atlanta, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to provide stream bank stabilization and repairs for the Rollins Corporation in Atlanta, GA.

The project included the restoration of a 400 foot long, 35 foot high, Level 2 Preferred Method restoration project with the Georgia EPD. The design showed the reduction of the slope to 2:1, the removal of unsuitable soils and placement of armored stone gabion mattresses. At the conclusion of site work, installation of the tow groins and the placement of live stakes were included. Paving work and installation of drainage structures located in the adjacent parking area conclude the project.

The largest construction challenge occurred in September of 2009 when heavy rains fell in Atlanta. Peachtree Creek rose beyond the 100-year flood level and threatened the stability of the bank. JMW had installed only 1/2 of gabion mattresses at the time and worked affectively to protect the slope from catastrophic failure.

Stone Mountain Dam Spillway Replacement

Stone Mountain, Georgia

J.M. Wilkerson Construction Co., Inc. was contracted to remove an existing 67-foot wide grouted rip rap spillway in Stone Mountain, GA.

The spillway is located on the south end of the Stone Mountain dam completed in 1965. This category 1 dam created the park's 363 acre lake. JMW replaced the existing spillway with a cast-in-place concrete stepped spillway with a control section and stilling basin. The spillway serves as the principal and emergency system for controlling the dam and lake levels. Completing the project on time was critical, as Stone Mountain Lake hosts the "Scarlet O'Hara" authentic paddlewheel riverboats, and many other recreational functions on the lake. The spillway is essential to controlling the level of the lake for all uses at the facility making this project critical to the parks use and business.

JMW placed over 4,000 cubic yards of concrete in nearly half an acre of surface area. This project was completed in less than seven months, finishing six weeks ahead of schedule.

Sweetwater Creek Restoration

McDaniel Farm Stream Restoration and Buffer Enhancement

Gwinnett County, Georgia

J.M. Wilkerson Construction Co., Inc. was the General Contractor for this project in Gwinnett County, GA.

The scope included the restoration of a portion of a tributary to Sweetwater Creek extending from the Sweetwater Creek, mainstream upstream approximately 2,430 ft. to the McDaniel Farm property limit. The project also included planting tree and scrub vegetation along the riparian buffer at Sweetwater Creek mainstream and a second (northern) tributary buffer planting component of the project included approx. 3,000 ft. of low impact pedestrian path and 3 foot bridges (prefabricated) were constructed. Re-vegetation of disturbed sites was also included in this contract.

Dewatering

Bypass Pumping

Erosion Control

Silt Fence, Rip Rap, Check Dams, Temporary & Permanent Grassing, Slope Mats

In-Stream Structures

Riffles, Step pools, J-Hooks, Cross Vanes, Wing Deflectors

Subcontractors

No Subcontractors were used for grading, stream restoration, storm sewerage, trails or landscaping.

Building for Generations

Compelling Reason To Choose J.M. Wilkerson Construction

What JMW Brings to the Table:

- Long standing history of successful construction.
- Team has years of diverse construction experience.
- Understanding of large and small projects.
- Extensive background in both Commercial and Heavy Construction.
- Sound financial and staffing history.
- JMW's team will devote partner level staff participation throughout the entire development and construction process.
- Available and talented staffing ready to participate.
- Necessary bonding, safety and construction licenses to participate.

J.M. Wilkerson Construction possess the necessary skills and expertise to provide a well coordinated, cost effective solution meeting all of the needs of this project. What we really bring to the table is a team steeped with years of construction experience. We have never failed to complete a project and commit ourselves to deliver the highest quality project possible.

At J.M. Wilkerson we pride ourselves on our communication. To communicate clearly, as well as to document those decisions, is an essential component of every successful project. Portraying our message in written and visual formats is key, but equally important are the people delivering the message. We select a team of experts at a Principal level to execute each project according to the scope of work. JMW takes care at the beginning of each project to assign a team of staff who are best qualified to deliver the best service to our client. We value our clients and allocate staff thoughtfully. The team will be in place from pre-construction until the punch-list phase. The employees of JMW have decades of experience both in the office and in the field. Our people are our biggest asset and deliver outstanding quality for the most competitive price.

Thank you for the opportunity to submit our team's qualifications, please do not hesitate to contact anyone listed with questions or additional information needed for your team's assessment of our company.
