

Hardman Farm - Phase I Stabilization

Helen, Georgia

J.M. Wilkerson Construction Co., Inc. was the general contractor for Hardman Farm Phase I Stabilization project in Helen, GA.

This project was located on a 170 acre historic farm located in Helen Georgia and consisted of the stabilization of 23 buildings including a 7000 square foot, two story timber framed dairy barn that was leaning to one side by more than 18 inches. Each building was stabilized using period detailing and materials and with the long term preservation of the site in mind. JMW also stabilized a landmark gazebo that was located on the top of an Indian Mound that was believed to have been built between 800 and 1450 A.D. This project was completed on time and within the Georgia Department of Natural Resources budget.
