

# VA Medical Center Pedestrian Bridge

Decatur, GA

J.M. Wilkerson Construction Co., Inc. partnered with the Disabled Veteran company, Biosphere International, for the construction of the new pedestrian bridge located at the Decatur VA Medical Center.

This bridge spans over 4 lanes of traffic and was constructed while the hospital facilities, as well as the main entry to the ER remained open and operational. The main span was lifted in 2 sections and placed after hours to provide minimal disruption to the facility. Our teams completed this complex structure on time and within the VA's budget.
